4. csaxton 9/8/2014 Diversion rate combined use limit
Comment: Diversion rate capacity of the well (well 2) shared by 35-2066B and 35-13338 is 3.61 cfs as measured during field exam on 7-22-1996. Since the sum of the diversion rate authorized by each right exceeds 3.61 cfs, a combined use limit on diversion rate is required.

Comment: This right overlaps surface water shares supplied by Aberdeen Springfield. The permit was not issued as a supplemental permit, but it appears to have been developed as supplemental. Add supplemental conditions.
