Re: Application for Permit 15-7380

Dear Mr. Cefalo,

Please find enclosed a copy of the well interference study report for our Application for Permit 15-7380. The study was conducted by Rocky Mountain Environmental Services in response to request by the IDWR and to comply with the reporting requirements of Idaho Water Appropriation Rule 40.05.

The conclusion of the report suggests our proposed water appropriation of 0.3 cfs for grazing pasture irrigation will have minimal impact on any neighboring wells within ½ mile of the groundwater diversion point (well D0065327).

We respectfully request that our application be approved. Please let us know if you require any further documentation. We also sincerely appreciate how helpful you have been throughout this process.

Sincerely,

Gary Lund
