

MEMORANDUM

To: Water Right No(s). 61-2154, 61-7005, 61-7119, 61-7396 and 61-10378
From: Clay Webster
Date: Sept 16, 2014
Re: Problems with combined use limits

While reviewing these rights for water supply bank lease applications, I discovered what appears to be an error in combined use limits on the acres allowed to be irrigated. The acre limit with five water rights is diminished when water right 61-7119 is added to the other four water rights.

I also found that the combined limit on the volume for water rights 61-2154 and 61-10378 appears to be an error. 61-10378 is an enlargement right of 61-2054 with no additional volume. However, the combined limits on these rights increase the volume from 1,088 to 1,276 af.
