

MEMORANDUM

Date: September 3, 2014
To: Transfer 79468
From: Cooper Fritz
Re: Review & Evaluation of Sufficiency of Information

This transfer proposes to move right 25-14381 into the City of Ammon water supply system, adding PODs and changing the POU to be the city's municipal service area. The nature of use will be changed to municipal and the water will be used for municipal irrigation purposes. Therefore, there will not be a reduction in volume for historic consumptive use.

Authority to File:

The applicant, Idaho Water Company, LLC, has the authority to file. Idaho Water Company, LLC, is the current owner of the right per department records, and is an existing corporation according to the Idaho Secretary of State's website. The application was signed by Del Kohtz, who is a registered agent of the corporation.

Water Right Validity:

The water right is valid. It is leased to the water supply bank through 12/31/2014, however, it is unrented.

Injury to Other Water Rights:

No injury to other water rights will occur as a result of this transfer. An analysis of the transfer done through the ESPA Model Spreadsheet demonstrates that impacts all to reaches are less than two acre-ft per trimester. The transfer was advertised and no protests were received. The Watermaster for water district 120 was notified of the transfer and indicated that he did not oppose it.

Enlargement of Use:

No issues identified. Rate, volume, nor irrigated acres will be increased.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
