WATER RESOURCES
WESTERN REGIONSTATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
APPLICATION FOR PERMIT
To appropriate the public waters of the State of Idaho

1. Name of applicant(s) Novitas Academy Phone 208-365-3437
 Name connector (check one): ☐ and ☐ or ☐ and/or
 Mailing address c/o Dr. Andy Sapp, PO Box 678 City Emmett
 State ID Zip 83617 Email _____
2. Source of water supply Ground Water which is a tributary of _____
3. Location of point(s) of diversion:

TWP	RGE	SEC	Govt Lot	1/4	1/4	1/4	County	Source	Local name or tag #
7N	1W	34	1		NW	NW	Gem	Ground Water	
		34	1		NW	NW	Gem	Ground Water	

4. Water will be used for the following purposes:
- Amount 0.11 cfs for Domestic purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 0.45 cfs for Irrigation purposes from 3/1 to 11/15 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount 3.35 cfs for Fire Protection purposes from 1/1 to 12/31 (both dates inclusive)
 (cfs or acre-feet per year)
- Amount _____ for _____ purposes from _____ to _____ (both dates inclusive)
 (cfs or acre-feet per year)
5. Total quantity to be appropriated is (a) 3.91 cubic feet per second (cfs) and/or (b) _____ acre feet per year (af).
6. Proposed diverting works:
- a. Describe type and size of devices used to divert water from the source. Two proposed wells, pressurized irrigation and domestic system
- b. Height of storage dam _____ feet; active reservoir capacity _____ acre-feet; total reservoir capacity _____ acre-feet. If the reservoir will be filled more than once each year, describe the refill plan in item 11. For dams 10 feet or more in height OR reservoirs with a total storage capacity of 50 acre-feet or more, submit a separate Application for Construction or Enlargement of a New or Existing Dam. Application required? ☐ Yes ☐ No
- c. Proposed well diameter is 8 & 16 inches; proposed depth of well is 200 feet.
- d. Is ground water with a temperature of greater than 85°F being sought? ☐ Yes ☐ No
- e. If well is already drilled, when? _____; drilling firm _____;
 well was drilled for (well owner) _____; Drilling Permit No. _____.
7. Description of proposed uses (if irrigation only, go to item 8):
- a. Hydropower; show total feet of head and proposed capacity in kW. _____
- b. Stockwatering; list number and kind of livestock. _____
- c. Municipal; complete and attach the Municipal Water Right Application Checklist.
- d. Domestic; show number of households Boarding school facility consisting of 50 students and 30 staff
- e. Other; describe fully. Fire protection for school facilities and grounds

8. Description of place of use:

- a. If water is for irrigation, indicate acreage in each subdivision in the tabulation below.
- b. If water is used for other purposes, place a symbol of the use (example: D for Domestic) in the corresponding place of use below.
See instructions for standard symbols. (see attached supplement sheet)

TWP	RGE	SEC	NE				NW				SW				SE				TOTALS
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	

Total number of acres to be irrigated: 20 acres w/ a 26-acre permissible place of use

9. Describe any other water rights used for the same purposes as described above. Include water delivered by a municipality, canal company, or irrigation district. If this application is for domestic purposes, do you intend to use this water, water from another source, or both, to irrigate your lawn, garden, and/or landscaping?
Surface water from Last Chance Ditch Co.

10. a. Who owns the property at the point of diversion? Applicant
- b. Who owns the land to be irrigated or place of use? Applicant
- c. If the property is owned by a person other than the applicant, describe the arrangement enabling the applicant to make this filing:

11. Describe your proposal in narrative form, and provide additional explanation for any of the items above. Attach additional pages if necessary.

A 0.06 cfs/acre diversion rate is proposed on 5 of the 20 acres, consisting of school landscaping and 2 soccer fields, to allow irrigation within an 8-hour period to avoid interference with student and athletic activities during school sessions. The standard 0.02 cfs/acre is proposed for the remaining 15 acres. Total peak water demand for domestic uses is not expected to exceed 50 gpm or 0.11 cfs. Water bearing zone to be appropriated is from 100 to 200 feet (not expected to be hydraulically connected to Payette River)

12. Time required for completion of works and application of water to proposed beneficial use is 5 years (minimum 1 year).

13. **MAP OF PROPOSED PROJECT REQUIRED** - Attach an 8½" x 11" map clearly identifying the proposed point of diversion, place of use, section #, township & range. A photocopy of a USGS 7.5 minute topographic quadrangle map is preferred.

The information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

LEGAL NOTICE DEPARTMENT
MESSENGER INDEX
PO BOX 577
EMMETT, ID 83617

RE: Application For Permit No's: 65-23588, 65-23589

Dear Legal Notice Department:

Please publish the enclosed legal notice on the dates indicated (once a week for two consecutive weekly issues). If you cannot publish the notice on the proposed dates, please contact us immediately.

An affidavit of publication must be submitted to the Department along with the publication bill. Please send the affidavit and bill to this office before 10/6/2014. Your cooperation is appreciated.

Sincerely,

Rachel Sommer
Administrative Assistant

Enclosures

The following applications have been filed to appropriate the public waters of the State of Idaho:

65-23588

NOVITAS ACADEMY

C/O ANDY SAPP

PO BOX 678

EMMETT, ID 83617

Kay Walker
IDWR Western Region Office
2735 Airport Way
Boise, ID 83705

Subject: Water Right Permit Applications 65-23588 & 65-23589 – Novitas Academy
SPF Project No.: 1091.0020

Dear Kay,

This letter is a response to your correspondence dated July 17, 2014. In your letter, you requested additional information to clarify and support two *Applications for Permit* listed above. Our response on behalf of the Novitas Academy is provided in the order requested.

1. *What is Andy Sapp's title or position in the Novitas Academy?*

Dr. Andy Sapp is the owner and operator of the facility.

2. *Why are you filing on an excess rate (0.06 cfs/acre) for some acres if the well is just to supplement the Last Chance Ditch Company water?*

Per Application Processing Memo No. 60, the Department accepts higher diversion rates/acre in certain instances, including applications for schools. Shorter irrigation windows are practical for school grounds and result in fewer conflicts with students, parents, and sports field users. These irrigation windows may occur during times when surface water may not be available such as evenings, early mornings and/or weekends.

3. *We need some information showing there is enough water available for the proposed flow rate of 3.91 cfs.*

SPF reviewed available well drillers' reports in the area of the proposed wells to assess the likelihood of drilling productive wells on the property with adequate capacity to provide 3.91 cfs for domestic, irrigation and fire protection uses proposed on application 65-23589. Most local wells are relatively shallow, with small diameter casing constructed to obtain domestic yields of less than 50 gpm. However, larger diameter wells with higher capacities have been constructed in the area. Reports were reviewed for 12 high-capacity wells shown in Figure 1. Information about the wells is summarized in **Error! Reference source not found.** Total depths for the 12 wells range from 40 to 535 feet, with an average depth of 155 feet.

The four largest diameter wells in Table 1 are each capable of production rates in excess of 3.91 cfs (1,755 gpm). These wells are two City of Emmett municipal wells (16-inch and 24-inch casings), an Emmett School District well (18-inch casing), and the Sheppard Wood Van & Storage well (16-inch casing). Copies are attached. Based on these productive, large-diameter wells, the target production zones for the proposed Novitas Academy well will be 100 to 250 feet below ground surface. These well driller reports suggest that there will be sufficient cold ground water available at the site to support the proposed 3.91 cfs pumping rate.

Please contact us with any questions.

Sincerely,

Lori Graves

Terry M. Scanlan, P.E.

RE: Applications for Permit Nos. 65-23589 & 65-23588 in the name of Novitas Academy

Dear Lori:

We are in the process of reviewing the above applications for permit and find we need additional information before we can go any further.

The applications have been signed by Andy Sapp. What is his title or position in the Novitas Academy? This information was not included with the applications when submitted.

On Application 65-23589 for domestic, irrigation and fire protections purposes:

1. Why are you filing on an excess rate (0.06 cfs/acre) for some acres if the well is just to supplement the Last Chance Ditch Company water?
2. Most of the water under this application is for fire protection purposes, however, we need some information showing that there is enough ground water available for the proposed flow rate of 3.91 cfs.

Please respond to the above information within the next 30 (thirty) days for processing to continue. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. Your response or a request for more time to seek the information must be received by August 17, 2014. The applications may be voided without a timely written reply.

If you have any questions or concerns regarding this matter, please do not hesitate to contact me.

Sincerely,
