MEMORANDUM

To: Water Right No(s). 34-282C, 34-452E, 34-2438 and 34-10795
From: Clay Webster
Date: August 7, 2014
Re: Review of Applications to Lease Water Rights to the State Water Supply Bank

PURPOSE/NARRATIVE: The department received applications to lease part of the water rights into the WSB on May 2, 2014. I contacted the Big Lost River Irrigation District on 8/5/2014 to see if the Bingham had any storage through them. They do not.

AUTHORITY TO FILE: The applications were signed by Max and Cheryl Bingham current owners of these water rights. They also enclosed a letter from the Big Lost River Irrigation District authorizing them to lease up to 45.6 acres.

WATER RIGHT VALIDITY: 34-282C and 34-452E were partially decreed by the SRBA in March 2009. Forfeiture for these rights is not an issue. 34-2438 and 34-10795 were partially decreed in December 2001. The applicant has stated on the applications in question 3D that attempt at delivery to the corners has been attempted but not accomplished. They have provided a letter from the old watermaster to confirm this statement.

INJURY TO OTHER WATER RIGHTS: No injury is apparent.

ENLARGEMENT OF USE: No enlargement is evident through the lease alone. Proper rental review should protect against enlargement.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The lease appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The leased right(s) are subject to Water District # 34. The water master had no problems with this lease. The Eastern Region had reservations about the resumption of use of these rights after 2011. However, after discussion in the WSB processing meetings and in light of the fact that the surface water rights were partially decreed in 2009 and these rights were being irrigated in the last five years and the fact that the past water-master had attempted to assist the Bingham in irrigating the corners without success showing a defense to the forfeiture issue. We decided to move forward with this lease.

Mr. Perkes,

I am currently processing these applications. They have stated that they have not been able to reach the corners of these rights. They have provided a letter from Roger Totten stating that he assisted in this effort, it is in the applications.

The rights that are under scrutiny are the ground water rights due to their date of decree. Do you have any comments/concerns with these applications?

Clay,

I have significant reservations about accepting any portion of these water rights into the WSB. Aerial photos suggest that these water rights were not used at all between 2004 and 2011. The ground water well is located on the property and the ground water rights authorize 0.17 cfs/acre so there is not really a reason for not irrigating. Upon 5 years of non-use, the water rights would have been forfeited. I believe that resumption of use does not apply to fully appropriated basins like the Big Lost River basin. Therefore, when they started using the water again in 2011, it was not authorized by any water rights. As always, I will defer to your conclusion on the forfeiture question.

Re: Water Supply Bank Applications

Dear Agent,

Enclosed are four applications to Lease water into the Water Supply Bank for water right nos. 34-282C, 34-452E, 34-2438, and 34-10795 and a check for \$500 to cover filing fees. Portions of each of these water rights, which share a permissible place of use, are offered to the Bank. There are some factors to note that explain the calculations used to determine acreages offered for each water right.

The applicant diverts water from the Big Lost River through the Lower Burnett ditch, which delivers to the property. Changes in irrigation practices and water availability in the ditch have affected the ability for water to reach all of the lands within the place of use. Even the ground water right, which is delivered through the Lower Burnett ditch, has not been deliverable to those acres. The water master of Water District 34 attests to this in an affidavit under Attachment #3D for each of the water rights. Consequently, applicant desires to Bank the portions he cannot deliver to his own property.

In creating the map for Attachment #4, it was discovered that the shapefile, available from IDWR GIS Database, does not correspond to the place of use description for the water rights. The acres per QQ do not match. To determine how many acres are to be offered to the Bank, a reverse approach was used. The irrigated acres are displayed on the map for the portions that WILL NOT be leased to the Bank. A simple subtraction from the place of use description resulted in the number of acres not being irrigated, which is the number of acres proposed to be leased. An attached spreadsheet displays the values determined in this process, along with the acre limits and cfs associated with each water right.

The applicants have authorized us to act on their behalf in regards to these applications. If you have questions or concerns, please contact me at 524-2353 or through my email kmoore@rockymountainenvironmental.com.

Thank you,
