RE: Licensed Water Right 95-16568

Dear Mr. Rocchio:

A recent review of water rights in our Northern Region found that a change has occurred to the Geographic Coordinate Data Base (GCDB) representing the Public Land Survey (PLS) used to define locations of water rights. The change split original Government Lot 2 into currently shown Government Lot 2(SWNE) and Lot 3(NWSE).

Licensed Right 95-16568 describes both the point of diversion and place of use as being located within **Government Lot 2(SWNE)** according to the GCDB existing at the time of licensing. Following the change to the GCDB Right 95-16568 is more accurately described as **Government Lot 3(NWSE)**.

You are not required to file a transfer to correct this GCDB legal description change, nor will the Department initiate any enforcement action based on the resulting discrepancy. A remark has been added to our database record of this right as shown in the enclosed Water Right Proof Report for future reference. And a copy of this letter will also document recognition of the GCDB change in the water right file. The right also includes reference to a subdivision location that clarifies the actual location of use.

You have several options related to this change in legal description:

- take no action and live with the discrepancy
- file an adjudication claim and get the description updated in that process
- or file an application for transfer to correct the legal description.

I have enclosed a proof report that includes the authorized description of your right and a GIS layout showing the new lot divisions. If you have any questions please contact me (phone #208-287-4951) or our staff in our Northern Region office (phone #208-762-2800) and we will be happy to assist you.

Sincerely,

A handwritten signature in cursive script, reading 'Pamela S. Skaggs'.

Pamela S. Skaggs
