RE: 37-21949 and 37-21950

Dear Mrs. Bohrer,

As we discussed in our phone conversation today, our office has record of two water rights currently associated with the well on the Call property. Enclosed are proof reports for the two water rights (37-21949-Bohrer and 37-21950-Call). As I understand historically these properties were at one time one parcel but they were split into two parcels a few years ago.

As we discussed, I understand you are concerned that you may lose your water right if you do not drill a new well on your property. This is not the case if you continue to irrigate your land from the existing well. I am not certain what type of well sharing agreement you have with the neighbor, this is a private matter between you and the neighbor, but just because the property was split does not necessarily require that the rights be used out of separate wells.

If you choose to sever the relationship between your water right and the existing well, so you can develop your own well, you will need to file a "Transfer Application" that I understand you have been provided. This will need to be filed and approved prior to drilling a new well for your irrigation use.

Please note that the legal descriptions on the enclosed records were determined by a projected grid system since your land is part of an old "Homestead Entry Survey". The department has recently re-projected the grid system resulting in the legal descriptions on the records being slightly different. If you file a transfer we can help you rectify these records to the current grid system being used. I would suggest you visit the office for assistance in filing a transfer if that is what you decide to do.

If you have further question, please feel free to contact this office.

Respectfully,

A handwritten signature in black ink, appearing to read 'Allen Merritt'.
