Department of Water Resources
Eastern Region

July 27, 2014

**Attention: Gary Spackman and Frederic Price, State of Idaho Department of Water Resources,
Regarding the application for permit No. 29-14117 filed by Erdinch and Valia Tatar.**

I am the property owner directly adjoining the Tatar property to the north. The seasonal spring, mentioned in the permit, runs through our property as it leaves the BLM source approximately two hundred feet from our property line.

The above mentioned spring in the permit has been traveling through this route for an extended period of time as seen by the cattle trough used by local ranchers near my fence line and the water depressions on the lower parts of my property where it exits from running under ground. Area ranchers remember this spring on their hikes years before I owned this property, and it was a water source for their cattle when grazing on BLM land above our property. The spring also feeds the western Maple and Aspen trees that are abundant in this portion of our property.

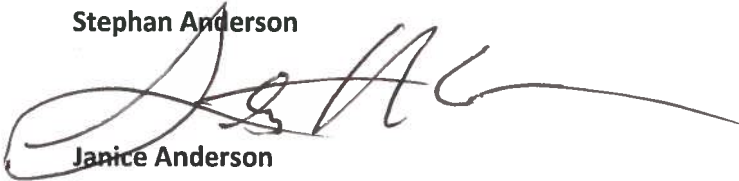

If the ownership of this spring is changed it will affect the natural route of the spring and its use for cattle grazing and all the trees and vegetation that it has fed for many years. I was told that at one time the spring eventually ran into Rapid creek during high snow-pack and run-off years.

I would like the water rights of the BLM spring in the above mentioned permit to remain in the ownership of the Bureau of Land Management. In addition, I believe the spring should remain as it has in preservation of the natural habitat as it stands today.

Please call me if you have any question or concerns. Mr. Tatar has never written or spoken to me regarding this issue. Perhaps it would be a good idea if he contacted me and we had polite conversation on this issue, like all good neighbors do.

Thank you for the mailed correspondence on the permit and I look forward to hearing from all the concerned parties on this issue.

Stephan Anderson
