An extension would be the proper route to take since you have not developed the permit for its proposed use. I have attached the form and instructions for your benefit. No fee is necessary. We will transfer the fee you paid for you Proof of Beneficial Use to the Extension Request.

You would need to file this in our Northern office by the close of business August 1, 2014 to avoid your permit being lapsed.

That office is located at 7600 N Mineral Dr, Ste. 100, Coeur d'Alene. [208-762-2800](tel:208-762-2800).

If you have any questions, please contact me at [208-287-4942](tel:208-287-4942) or the Northern Office. Thank you.

We are preparing the land to build on. We did not understand that we were required to have a building completed in order to be able to file for a water permit.

We have electric pumps that are currently being powered by a generator. We are able to water our garden. We are planning to build in the near future.

Do we need to request an extension?

Dear Water Permit Holder,

The Department of Water Resources is in the process of reviewing your water permit for licensing. Aerial photography suggests a permanent structure has not been built on the property in Kootenai County. I have attached a map for your information. What is the domestic use being used with? Recreational vehicle, tent, etc.....Can you explain how you are pumping the water from the spring to the land?

As soon as the Department receives this information from you, we will continue with the licensing process. If you have any questions, please contact me at the number below.
