Memo: To the File
From: Keith Franklin

On October 3, 2013 I met with Steven Cordes of Welch /Comer, who represents the applicant, to determine the amount of acreage proposed for the municipal water right so the department can estimate a volume for the permit. It was decided that each of the 85 homes would have a lawn and garden of $\frac{1}{2}$ acre, bringing the total acreage to 42.5 with a corresponding annual volume of 127.5 AF.
