PROPOSED CHANGE OF WATER RIGHTS

Ted and Heidi Dumont of PO Box 8084, Boise, ID, 83707, filed Application No. **79347** to transfer two water rights with 1866 and 1873 priority dates from Warm Springs Creek totaling 0.20 cfs. The purpose of the transfer is to add a point of diversion to the water rights. Water will be used at the current place of use approximately 2 miles north of Crouch, 4 miles northwest of Garden Valley, east side of South Middlefork Road and west of the Middle Fork of the Payette River.

For additional information concerning the property location, please contact Western Region office at 208-334-2190 or see www.idwr.idaho.gov/apps/ExtSearch/WRFiling.asp for a full description of the right(s) and the proposed transfer. Protests may be submitted based on the criteria of Sec 42-222, Idaho Code. Any protest against the proposed change must be filed with the Director, IDWR Western Region, 2735 Airport Way, Boise ID 83705-5082 together with a protest fee of \$25.00 for each application on or before 8/25/2014. The protestant must also send a copy of the protest to the applicant.

MEMORANDUM

TO: Transfer No. 79347
FROM: Kay Walker *KW*
DATE: July 24, 2014
RE: Evaluation of Application

The transfer proposes to add a point of diversion that is located on the applicants property to the water rights.

The site is located approximately 2 miles north of Crouch and 4 miles northwest of Garden Valley, on the east side of South Middlefork Road, and west of the Middle Fork Payette River.

Deviations from Transfer Policy Standards

The transfer application was submitted on a short form since only adding a point of diversion to this water right.

Summary of Information Submitted

Authority to File:

The applicants are the current water right owners.

Water Right Validity:

Right presumed to be valid based on aerial photography. The place of use was partially irrigated on aerial photos for 2013, 2011, 2009 and 2006.

Injury to Other Water Rights:

There should be no injury to other water rights as long as the parameters of the water rights are not enlarged.

Enlargement of Use:

No enlargement should occur since water user is just adding a point of diversion to his existing water right.

Local Public Interest:

It is within the local public interest to allow water right holders to divert their water at a point that is more efficient for them.

Beneficial Use/Conservation of Water Resources:

The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Discussion

Watermaster comments are not applicable. This water district is inactive.

Data entry affected the correct records which are the partial decrees issued by the SRBA court in August of 2004.

Overlapping rights at existing point of diversion in Sec. 34 will not change. The applicant is just adding a point of diversion on his own property that will allow him access to the source. There are no other rights diverted at the proposed point of diversion. The place of use is not changing so was not reviewed for overlapping rights.

Summary

Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.

RE: Application for Transfer No. 79347

Dear Mr. and Mrs. Dumont:

In my initial review of your application for transfer it was noticed that the proposed point of diversion in Section 3 was not reflected correctly on the application form. The application form shows the point of diversion in Section 3, Twp. 10N, Rge. 4E; however, we found that it is located within Section 3, Twp. 9N, Rge. 4E.

I have prepared an Amended Application form for your convenience. Please review the form for any errors and sign it on page 2. The form should be signed by both parties since both of you are shown as the water right holders. Also, please complete Item 6b on page 2. We need to know what arrangement you have made to place your point of diversion on the State lands.

Please submit the signed, amended application for application processing to continue. You may seek additional time to provide the information by making a written request to interrupt processing for up to six months. Your response including the amended form or a request for more time to seek the information must be received within the next 30 days. The application will be rejected without a timely reply. Refunds are not issued for rejected applications.

Please feel free to contact me if you have any questions in regard to this matter.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
