MEMORANDUM

TO: Transfer No. 79304
FROM: Sharla Curtis
DATE: July 21, 2014
RE: Evaluation of Application

The transfer proposes to move the point of diversion under two irrigation rights to the domestic well owned by the applicant. The site is approximately 2 miles southwest of Lake Lowell between Marsing Rd. and Deer Flat Rd.

Summary of Information Submitted

Authority to File: Ownership documentation submitted with the application. Splits of both rights were created based on this documentation.

Water Right Validity: Rights presumed to be valid because the partial decrees were issued within the past five year period.

Injury to Other Water Rights: None anticipated.

Enlargement of Use: No enlargement will occur; all parameters of water rights remain the same; the only change is the location of the point of diversion (well).

Local Public Interest: Agriculture is a major part of Idaho's history and land use. It is considered to be in the public interest.

Beneficial Use/Conservation of Water Resources: The application proposes beneficial use consistent with conservation of water resources in Idaho.

The application is consistent with criteria of I. C. § 42-222 and should be processed.

Data entry affected the correct records; partial decrees were issued & results were migrated to wr records.

There are no overlapping rights.

Summary

Assuming protests are not filed and/or other information does not contradict the above analysis, the application can be approved as reflected by the draft approval.

Condition 046 N/A since a new well is not proposed; well is existing and the applicant has paid a well upgrade fee.

Re: Application for Transfer of Water Right (#79304)
and Well Drilling Fee Upgrade

Dear Mr. Rajczak:

Your recent water right transfer application proposes ground water use from a well that was drilled in 2002 under a \$75 domestic well drilling permit. A \$75 drilling permit covers a well that does not require water right approval from IDWR. This is typically a single-family domestic well. Proposed use from your well does require water right approval, and your water right transfer application seeks that approval. The well drilling fee for a well used for irrigation is \$200 instead of \$75. IDWR must collect the unpaid balance of \$125 for a well drilled under those circumstances.

Also, because the water rights to be transferred are not ^{located in backlogged ownership change file.} currently in your name, an ownership change form and associated required documents (copy of warranty deed) are needed before we can proceed with advertising the transfer application. I've enclosed the appropriate document and instructions. Please note that there is a \$25 filing fee for each water right to be changed. In this case, two rights are listed on the transfer application, so a total of \$50 for ownership changes is required.

Please remit \$125 to upgrade your well drilling permit and \$50 for the water right ownership changes (for a total of \$175) within the next thirty days to facilitate processing of your water right transfer application.

IDWR forms and other information are available on the Internet at www.idwr.idaho.gov. Please contact me at 208-334-2190 if you have any questions. Thank you for your attention to this matter.

Sincerely,

SCurtis
