

## MEMORANDUM

**Date:** July 28, 2014  
**To:** Water Right File 71-10897  
**From:** amerritt  
**Re:** amend license

---

On this day I received a call from Mrs. Hughes regarding the issue of only using water in the house. She indicated that they use water outside of the house which includes watering stock and drip irrigating a small garden and keeping the lawn green around the home. Total irrigation is less than 1/4 acre. She said they have tried to irrigate with surface water but it floods the house so they manage close to the house with water from the well. She indicated when they purchased the home the realtor told them they had to file for a permit but the well and use was established years before. She indicated that others in the area drill wells without water permits and are not limited as they are to in-house use and want to be treated on an equal footing. She faxed a letter requesting re-issuance of the license removing the in-house limit.

I discussed the issue with the state office and decided to amend the license to remove the inhouse limit.
