Dear John Westra,

Please accept this letter as my second request for reconsideration of my permanent water right on 4/four acres for irrigation under license # 65-13767.

During the past thirteen years I have made beneficial use of my acreage by planting fruit trees (apples, cherry, plums, peaches and nectarines), nut trees (black walnut, english walnut and pecan) berries (raspberries, blackberries, goose berries and currants) and keeping livestock (both cattle and horses). On Oct. 22, 2013 the system was already turned off in preparation for winter.

The improvement of an underground irrigation system is further evidence of my intent to use the irrigation water when a permanent right is granted. The irrigation system was installed in 2000-2001. The drip system operates independent of the risers thereby minimizing water loss.

Please grant my request for a permanent water right on four acres.

Sincerely,
Karen C Bruner
