RE: Water Supply Bank Rental Fees for 2017 Rental Agreements

Dear Renter,

The following are your 2017 water rentals from the Water Supply Bank:

Rental	Start	End	Water Right	Rental Volume (AF)	Total Rental Fee	Owner Fee (90%)	Admin Fee (10%)	Rental Fee Due Date
1	2014	2018	36-16467	69.2	\$1,176.40	\$1,058.76	\$117.64	2/15/2017
1	2014	2018	36-16469	180.8	\$3,073.60	\$2,766.24	\$307.36	2/15/2017
1	2014	2018	36-16471	149.2	\$2,536.40	\$2,282.76	\$253.64	2/15/2017
Total				399	\$6,786.40	\$6,107.76	\$678.64	2/15/2017

Our records indicate that payment has not yet been received for the above water right rentals.

If you have not already done so, please remit payment of **\$6786.40** prior to the due dates above and enclose a copy of this letter with your payment.

If you have questions about your rental, you can contact me at 208-287-4918.

Regards,

Remington Buyer
Water Supply Bank Coordinator

RECEIVED
JUL 14 2014
DEPARTMENT OF
WATER RESOURCES

filed an application to rent water from the Water Supply Bank ("Bank"). The Idaho Water Resource Board ("Board"), being authorized to operate a Bank and to contract by and through the Director of the Idaho Department of Water Resources ("Director, Department") for rental of water from the Bank, agrees to rent water as follows:

Water Right	Priority Date	Source	Tributary	Rented Rate	Annual Rented Volume	Acre Limit	Total Rented Acres
36-16471	2/19/1954	Ground Water		0.75 cfs	149.2 af	NA	37.3 ac
36-16467	7/14/1954	Ground Water		0.35 cfs	69.2 af	NA	17.3 ac
36-16469	4/10/1958	Ground Water		0.62 cfs	180.8 af	NA	45.2 ac
Total Annual Combined Limit				1.72 cfs	399.2 af	NA	99.8 ac

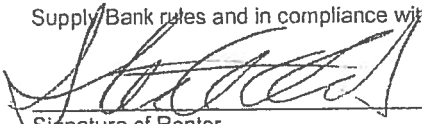

Rental Fee:	Years	2014-2017	\$6,786.4 annually
	Year	2018	\$7,984.0

CONDITIONS APPLICABLE TO ALL RENTED WATER RIGHTS

- The use of water under this agreement shall be subject to the provisions of Idaho Code § 42-1766.
- Rental of the specified right from the bank does not, in itself, confirm the validity of the right or any elements of the water right, or improve the status of the right including the notion of resumption of use. It does not preclude the opportunity for review of the validity of this water right in any other department application process.
- Use of water under this agreement does not constitute a dedication of the water to renter's place of use, and upon expiration of this agreement, the points of diversion and place of use of the water shall revert to those authorized under the water right and/or again be available to rent from the bank.

4. This rental does not grant any right-of-way or easement to use the diversion works or conveyance works of another party.
5. Use of water under this agreement shall not prejudice any action of the Department in its consideration of an application for transfer or permit filed by the applicant for this same use.
6. Renter agrees to comply with all applicable state and federal laws while using water under this agreement.
7. Renter agrees to hold the Board, the Director and the state of Idaho harmless from all liability on account of negligent acts of the renter while using water.
8. Renter acknowledges and agrees that the Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
9. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
10. This rental agreement does not authorize the construction of a well.
11. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.0 afa per acre at the field headgate for irrigation of the lands above.
12. Use of water under this agreement will be regulated by a watermaster with responsibility for the distribution of water among appropriators within a water district. At the time of this approval, this water right is within State Water District No. 130.
13. This agreement authorizes the irrigation of a total of 99.8 acres within the 2785 acre place of use authorized by the combined rights in a single irrigation season. The specific 99.8 to be irrigated by the right holder shall be identified prior to use by submittal of a land list and a representative electronic shape file or by submittal of a land list and a map sufficiently detailed to allow creation of an electronic shape file to be associated with this right in the geographic information system component of the water rights database maintained by the department. Before changing the 99.8 to be irrigated within the 2785 place of use, the right holder shall submit a new land list and representative electronic shape file or map to the Department prior to the irrigation season in which the change will occur.
14. This rental when combined with rights 36-2339, 36-8403, 36-2340, 36-2360, 36-2431, 36-15165, 36-2346, 36-2389, 36-2451, 36-2363, 36-4200, 36-16419, 36-16423, 36-16417, and 36-16421, are limited to the irrigation of 2,337.8 acres within a 2,785 permissible place of use.
15. Prior to the diversion and use of water under this agreement, the right holder shall install and maintain acceptable measuring device(s) at the authorized point(s) of diversion in accordance with Department specifications, or shall obtain an approved variance from the Department to determine the amount of water diverted from power records or to maintain an existing measuring device.

B. OWNERSHIP

1. Do you own the land at the proposed point of diversion?

Yes ☒ No ☐

If no, list owner, contact information, and attach a copy of the agreement or other written authority to use the proposed point of diversion. _____

2. Do you own the land at the proposed place of use?

Yes ☒ No ☐

If no, list owner, contact information, and attach a copy of the agreement or other written authority to use the proposed place of use. _____

C. MAP

Attach a map identifying the proposed point(s) of diversion, place(s) of use, and water diversion and distribution system details as described by this application in section A. Include legal description labels.

D. GENERAL INFORMATION

1. Please provide a description of the proposed diversion system.

Existing wells, mainlines and irrigation systems

2. Describe any other water rights diverted through the same point(s) of diversion or used for the same purpose(s) as described above.
36-2339, 36-8403, 36-2340, 36-2360, 36-2431, 36-15165, 36-2346, 36-2389, 36-2451, 36-2363, 36-4200, 36-16419,
36-16423, 36-16425, 36-16417, and 36-16421

3. Will the proposed place of use receive water from any other source? Yes ☐ No ☒

If yes, describe.

4. If the proposed use is not for irrigation, please provide a detailed description of the proposed use and how you determined the amount of water required. Attach additional sheets if needed. N/A

5. Are there any other applications pending before the Department, such as an application for permit or transfer, for the same use(s) proposed by this rental? Yes ☐ No ☒

If yes, describe.

6. Was this rental application submitted in response to a Notice of Violation or a pending Notice of Violation? Yes ☐ No ☒

If yes, describe.

E. RENTAL TERM

Do you wish to rent water from the Board's bank for more than one (1) year? Yes ☒ No ☐

If yes, please specify the number of years desired through proposed rental. 2014-2018

I hereby assert that the information contained in this application is true to the best of my knowledge. I understand that any willful misrepresentations made in this application may result in rejection of the application or cancellation of an approval.

If this application is approved, the applicant agrees to the following:

1. The use of water under this agreement shall be subject to the provisions of Section 42-1766, Idaho Code.
2. Renter shall comply with all applicable state and federal laws while using water under this agreement.
3. Renter shall hold the Board, the Director, and the state of Idaho harmless from all liability on account of negligent acts of the renter.
4. The Director may terminate diversion of water if the Director determines there is not a sufficient water supply for the priority of the right or portion thereof being rented.
5. Failure of the renter to comply with the conditions of this agreement is cause for the Director to rescind approval of the rental agreement.
6. Renter is not authorized to use water proposed by this application until the rental fees are paid in full and the renter receives an executed copy of the agreement signed by the Director.

Subject: RE: Global Ag Rental

Greg – My acreage analysis results are as follows:

Your digitized acres from 2013 (including Jesse's farm) indicates 2747.14 acres irrigated. Just looking, this seems high. Global's acreage map for 2014 (including Jesse's farm and the new corners) indicates a total of 2638 acres irrigated: 2370 on the main farm and 268 acres on Jesse's place.

There is a fairly significant difference in the two values, especially given that your number does not include the 4 new corners. I digitized a few of the individual pivots and came very close to Global's acres.

Since the 268 ac on Jesse's place is within the appurtenant water right 36-16501, there is no compliance issue there. Restricting analysis to the main farm, 2370 found – 2238 authorized = 132 acres in excess of the water right limits. Presuming that Global really does restrict irrigation to the identified areas on their 2014 map, this suggests only 132 acres may need to be rented, instead of the combined 235.9 acres .

How do you wish to proceed? If the rentals are processed for the entire 235.9 acres, that would total $2268 + 235.9 = 2503.9$ acres, still well within the PPU of 2785 on the main farm. I don't see a problem with this except that there may be unirrigated acres that are paid for. On the other hand, if Global has changed their plans or has planted an extra corner or two that wasn't identified, or some numbers are wrong, etc etc , an extra 100 acres would be fairly cheap insurance.

FYI I still think all 8 wells should be identified on the rental, even if the PPU is limited to the main farm, 2785 ac.

Cindy,

I updated the aerial map and included the new corner areas. We came up with 2781.8 acres total acres to be irrigated. Their water rights allow 2545.9 acres. We want to proceed with the rental application as submitted.

We have not broken down the irrigated areas per field or pivot to figure out where the difference in irrigated acres are. I do not think it matters too much as long as they have sufficient acres to irrigate their whole farm.

**RE: RENTAL OF WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 36-16471, 36-16467 AND 36-16469**

Dear Renter:

Please find enclosed a receipt in the amount of **\$6,786.40** and a copy of a fully executed Water Supply Bank Rental Agreement in connection with the rental of 399.2 acre-feet of water for irrigation of 99.8 acres during 2014. Upon receipt of this fully executed agreement, you are authorized to divert water in compliance with the conditions of water use described in the agreement.

Pursuant to the Water Supply Bank Rules, 90% or \$6,107.76 of the rental fee will be paid to the lessor(s) and 10% or \$678.64 will be retained by the Department to offset administrative costs.

If you have any questions, please contact me at (208) 287-4879.

Sincerely,

Sandra Thiel

**RE: APPLICATION TO RENT WATER FROM THE WATER SUPPLY BANK
WATER RIGHT NO(S). 36-16471, 36-16467 AND 36-16469**

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$6,786.40 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 399.2 acre-feet. An annual payment shall be received by the Department prior to the execution of this agreement and prior to February 15 in all subsequent years for the duration of the rental period. The agreement will be void if payment is not received prior to the due date in a given year. If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$6,786.40 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing. Pursuant to the Water Supply Bank Rules, 90% or \$6107.76 of the rental fee will be paid to the lessor(s) and 10% or \$678.64 will be retained by the Department to offset administrative costs.

If you have any questions, please contact me at (208) 287-4879.

Sincerely,

Sfor

OK, at long last. Included in this packet are the maps I got from Greg which you'll need to complete the applications, and another copy of his Exhibit A which lists the PODs. The POU he gives is just the 2785 ac water right PPU from the appurtenant rights. The included map from Global Ag entitled "Wickel" shows the specific acres irrigated this year and satisfies that condition 206 that I want added. It also has the numbers from my acreage analysis.

Sandy, when you update the rental shapes, PLEASE be sure you hit the correct spatial points. I've spent some time correlating and updating water right pods in this particular system and the pods are all correct. To help you I have included a map showing the WMIS database points for these wells (last page). The WMIS points are correlated to the water right pods. The wells in question are labeled 100660, 100661, 100662, 100663, 100664, 100665, 100666 and 100667. The WMIS layer is a process layer and you can load it in ArcMap.

FYI what I keep referring to as "Jesse's place" is water right 36-16501 which uses the 8th well (100660) and is adjacent on the north side of the PPU. Global has purchased that too.

For the rental POU shape, ordinarily I would ask you to update to those specific 235.9 acres. However since they are going into an unspecified PPU and there appear to be more acres being rented than are necessary for this year (unless Greg modifies the rental..?), AND I have a map, just go ahead and update to the water right PPU shape. That will be easier.

I'll be in today if you have any questions. I've not heard back from Greg regarding the extra acres. He was in a big hurry for this so I'd say if you don't hear from him, give 'em what they asked for.

Department of Water Resources

RECOMMENDATION OF WATERMASTER

Application No: Water Supply Bank Rentals
Water Right No: 36-2254A, 36-2284, 36-8401 (Sunrise Organic)
36-16467, 36-16469, 36-16471 (Vandervegt)
Applicant Name: Global Ag Properties

Watermaster's Recommendation:

- a) ☐ I do not oppose approval of this application
- b) ☒ I do not oppose approval of this application under the following terms:

All eight interconnected wells shown as authorized pods
Condition to a maximum annual combined acreage of 2503.9 acres within the 2785 acre PPU (or less if rental is modified – see comments).
Add condition 206 requiring annual verification of irrigated acres within the PPU (this condition has been met for 2014)
Add condition 214

- c) ☐ I oppose approval of this application(s) for the following reasons:

- d) ☒ Additional comment:

These rental acres are intended to supplement decreed water rights for irrigation of additional acres in a 2785-acre PPU using a total of 8 wells. Applications were insufficient in that they did not include either a POD list or maps. Also, because the water rights do not contain condition 206 language, we do not have a map on file depicting the 2238 authorized pou acres. I obtained maps and a pod list from Brockway which I am forwarding with this recommendation.

The sixteen appurtenant rights in the pou authorize diversions from a system of 7 wells. In fact there are 8 interconnected wells, including the well in NENENW Sec 9, authorized under 36-16501 on adjacent lands and also owned by Global Ag. The pod list was modified to include all 8 wells and it is appropriate to include all of them. The lands under 36-16501 are NOT included in the rental pou.

A total of 235.9 acres are proposed to be rented under the above rights and used within the 2785-acre PPU. This would authorize a maximum of 2503.9 irrigated acres during the rental period. Global Ag's farm map for 2014 indicate that 2370 acres will be irrigated within the PPU during 2014, and a separate 286 acres under 36-16501. 36-16501 is within acreage limits so rental acres are not required. In the PPU, 2370 acres is more than the decreed limit of 2238 acres, but less than the proposed rental of 2503.9. For 2014 there may be more acres rented than actually needed. However, I do not know what Global's plans are for the next 3 irrigation seasons, so they may want to proceed with the entire amount of the proposed rental.

All wells are within WD130 and are being measured and reported through Magic Valley Ground Water District. The use of condition 214 will be consistent with existing water right conditions (existing rights contain condition 131 which has been replaced with 214).

Watermaster's Recommendation:

a) ☐ I do not oppose approval of this application

b) ☒ I do not oppose approval of this application under the following terms:

All eight interconnected wells shown as authorized pods
Condition to a maximum annual combined acreage of 2473.9 acres within the 2785 acre PPU (or less if rental is modified – see comments).
Add condition 206 requiring annual verification of irrigated acres within the PPU (this condition has been met for 2014)
Add condition 214

c) ☐ I oppose approval of this application(s) for the following reasons:

d) ☒ Additional comment:

These rental acres are intended to supplement decreed water rights for irrigation of additional acres in a 2785-acre PPU using a total of 8 wells. Applications were insufficient in that they did not include either a POD list or maps. Also, because the water rights do not contain condition 206 language, we do not have a map on file depicting the 2238 authorized pou acres. I obtained maps and a pod list from Brockway which I am forwarding with this recommendation.

The sixteen appurtenant rights in the pou authorize diversions from a system of 7 wells. In fact there are 8 interconnected wells, including the well in NENENW Sec 9, authorized under 36-16501 on adjacent lands and also owned by Global Ag. The pod list was modified to include all 8 wells and it is appropriate to include all of them. The lands under 36-16501 are NOT included in the rental pou.

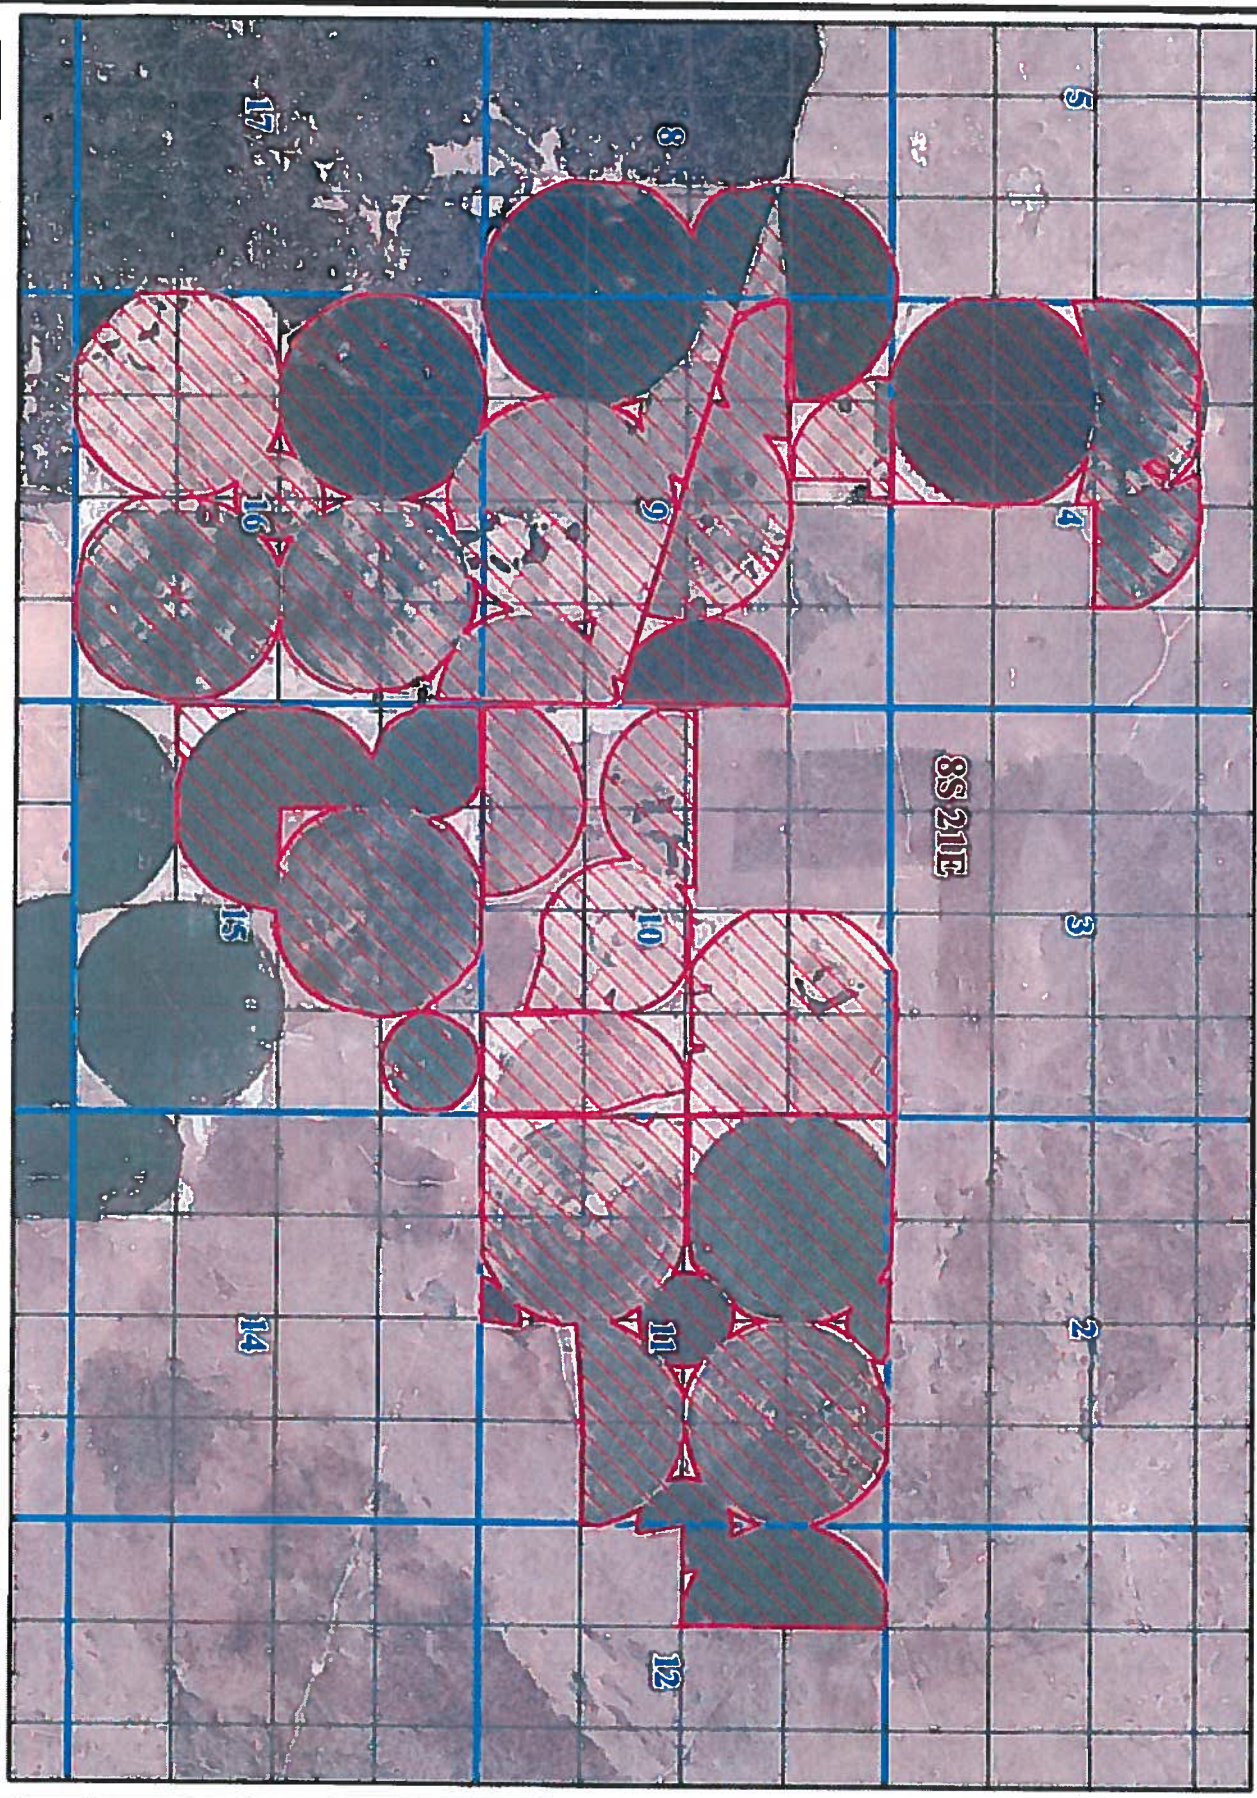

A total of 235.9 acres are proposed to be rented under the above rights and used within the 2785-acre PPU. This would authorize a maximum of 2473.9 irrigated acres during the rental period. Global Ag's farm map for 2014 indicates that 2370 acres will be irrigated within the PPU during 2014, and a separate 286 acres irrigated under 36-16501. 36-16501 is within acreage limits so rental acres are not required. Brockway's acreage map conflicts with Global's map and indicates up to 2496 acres in the PPU, yet shows the same general acres. My check satisfied me that Global's acre count is the more reasonable of the two. In the PPU, 2370 acres is more than the decreed limit of 2238 acres, but less than the proposed rental of 2473.9. For 2014 there may be more acres rented than actually needed. However, I do not know what Global's plans are for the next 3 irrigation seasons.

All wells are within WD130 and are being measured and reported through Magic Valley Ground Water District. The use of condition 214 will be consistent with existing water right conditions (existing rights contain condition 131 which has been replaced with 214).

Re: Review of Applications to Lease and Rent Water Rights through State Water Supply Bank

PURPOSE/NARRATIVE:

LEASE:

On February 26, 2014 Irene Vandervegt Gibson submitted applications to put water rights 36-16467, 36-16469 and 36-16471 into the Bank. The three rights combined are limited to the irrigation of 381.2 acres. They intend to lease 99.8 of those acres into the bank.

$99.8 / 381.2 = 26\%$ This was used to determine the acre limit for each of the water rights leased into the bank.

According to the application the place of use will continue to receive water from 36-16468, 36-16470 and 36-16472. These rights are for stock and commercial water. Ms Gibson intends to lease these rights into the bank through December 2018.

These three rights are also part of transfer 79144. They are changing 31.5 acres to dairy use at a new location. To do this they are taking off the end guns and are reducing the size of the large pivot. This is primarily in the south west of section 6. This doesn't include the 5.8 acre corner in SENW. The transfer and lease acres are separate.

The attached map shows the lease and rental place of use.

RENTAL: Global Ag Properties USA (Westchester Group Investment Management) proposes to rent these three water rights to irrigate 99.8 acres. The rental will be from 2014 through 2018. An existing well and mainline will serve as the irrigation system. The place of use for sixteen other irrigation water rights overlap the rental place of use: 36-2339, 36-8403, 36-2340, 36-2360, 36-2431, 36-15165, 36-2346, 36-2389, 36-2451, 36-2363, 36-4200, 36-16419, 36-16423, 36-16425, 36-16417, 36-16421

AUTHORITY TO FILE: Irene Vandervegt Gibson is the owner of all three water rights.

WATER RIGHT VALIDITY: The place of use for these water rights shows evidence of irrigation over the past several years so forfeiture is not an issue.

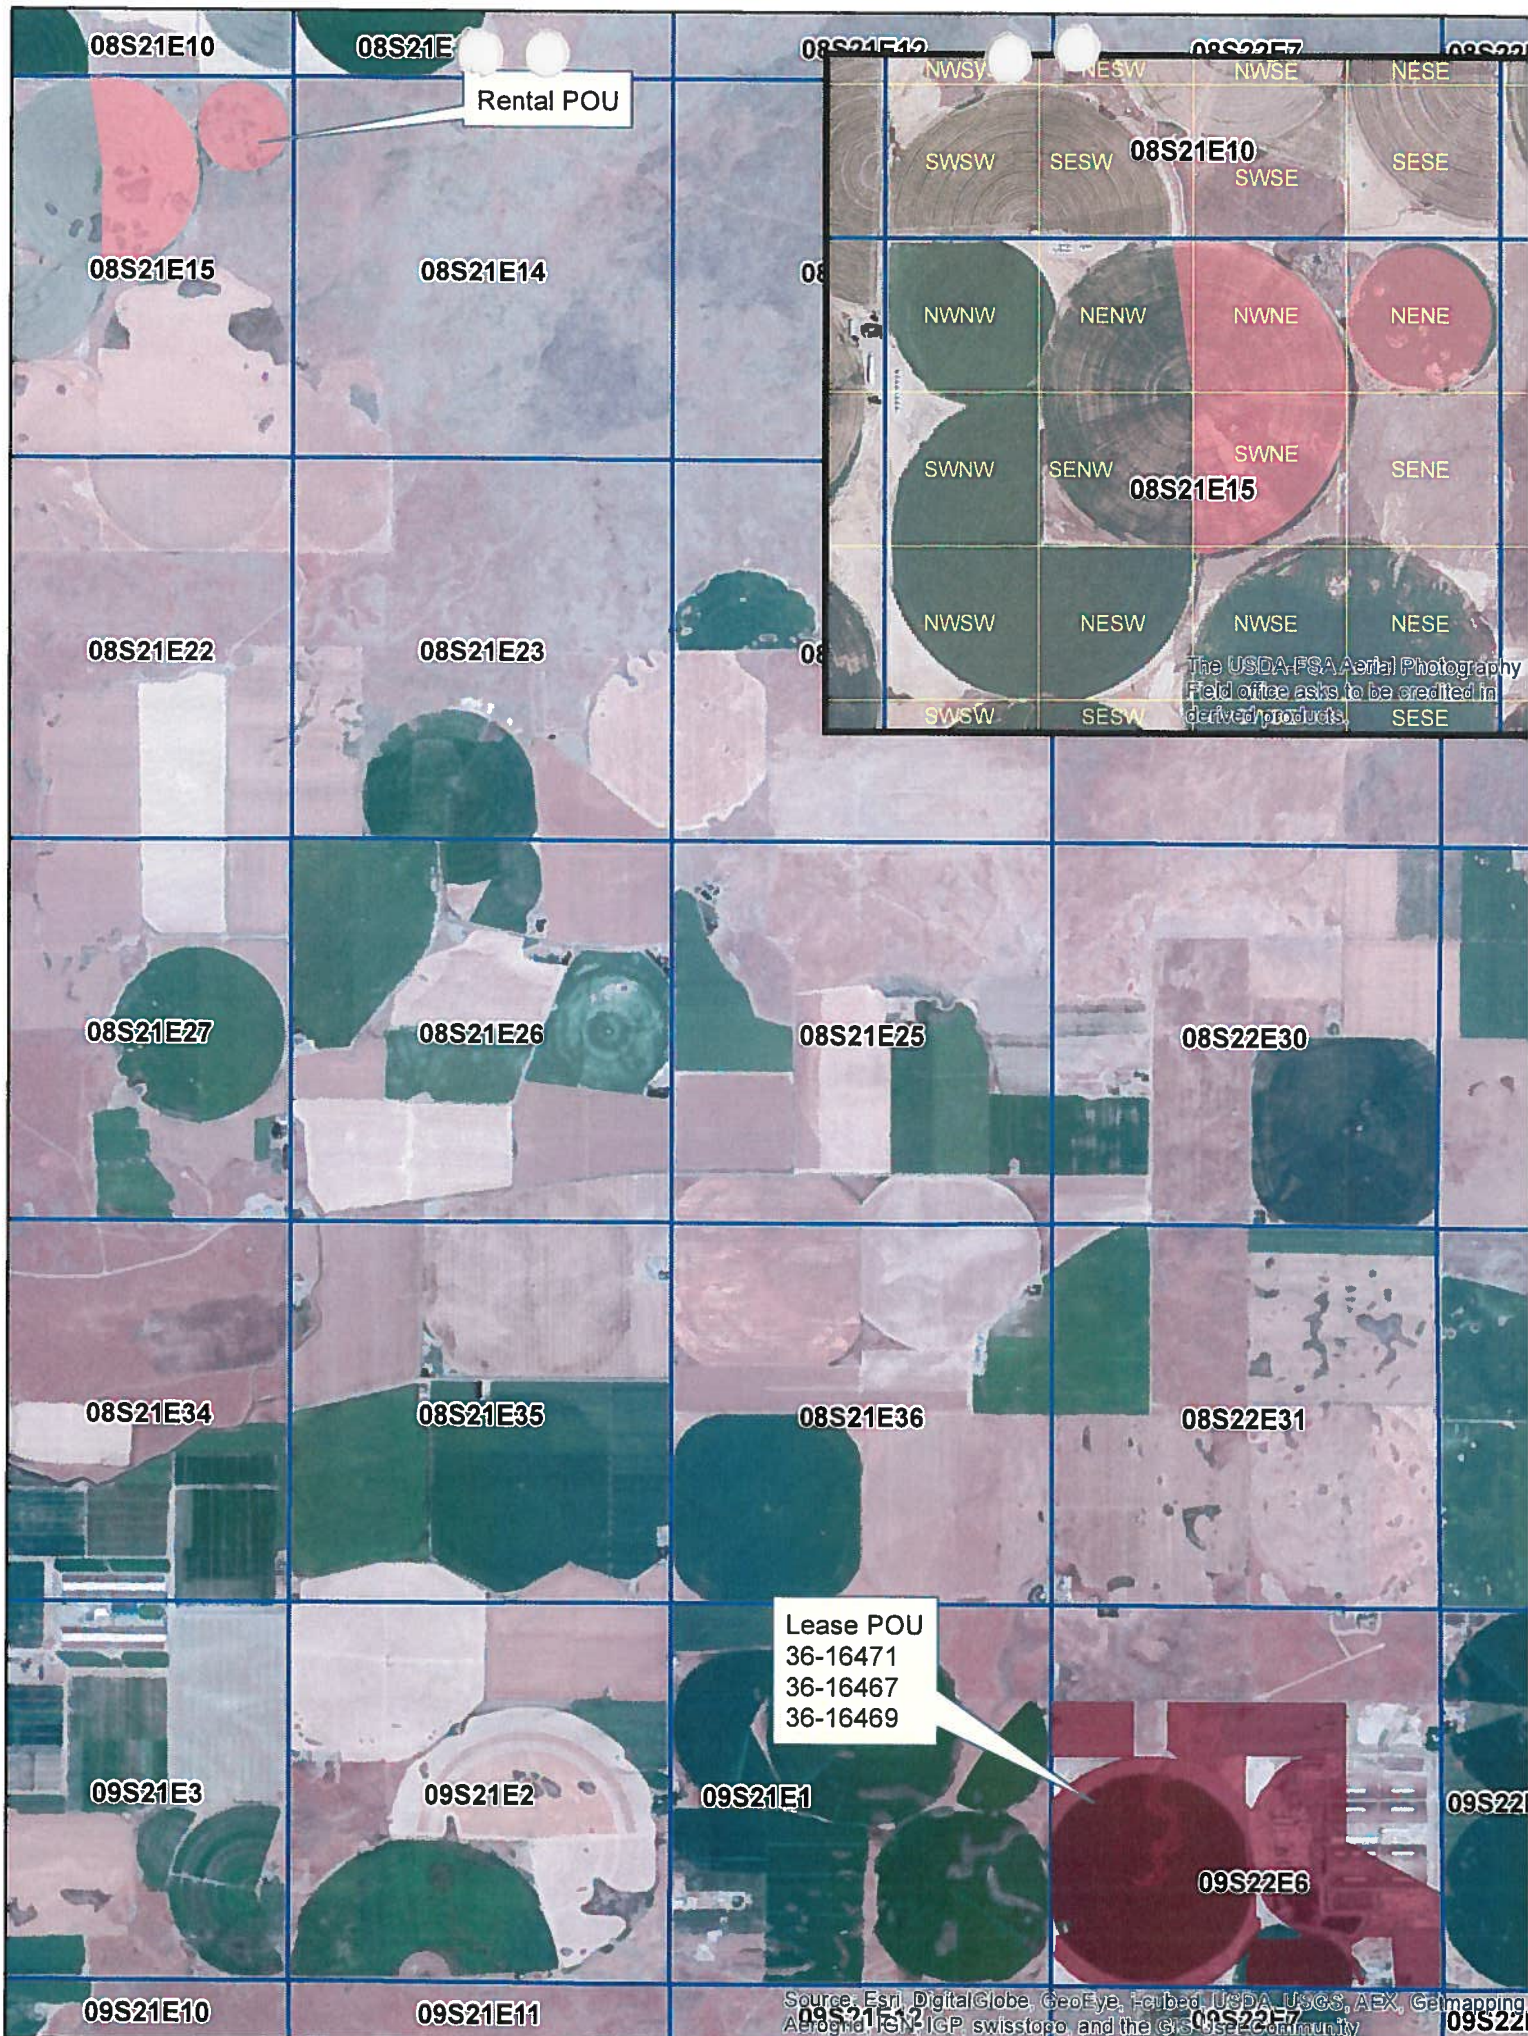

INJURY TO OTHER WATER RIGHTS: No injury is apparent.

ENLARGEMENT OF USE: No enlargement is evident.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The leases and rental appear to be consistent with conservation of water resources in Idaho

DEPARTMENT STAFF OR WATERMASTER COMMENTS: The rental falls within water district 130. Watermaster Cindy Yenter was contacted for comment— please see attached emails.

Sandy – the Global Ag/Sunrise and Global Ag/Vandervegt rentals may be processed. I have reviewed the overlapping transfer applications and while we're not yet ready to finalize the transfers, I have eliminated any questions of conflict regarding the above rentals.

Tomorrow I will send you formal watermaster comments on these two rentals. . I've not looked at that Global system very closely and need to see if there are any measurement concerns.

Subject: RE: water supply bank lease for Irene Vandervegt Gibson

Sandra,

The three water rights are additive for diversion, volume and acre amounts. That is why the original leases contract was only for 36-16469. Any one of the three water rights can be transferred off or leased to the Water Bank without affecting the other two water rights.

The lease applications can be processed with portions from all three water rights or a lump sum from one water right. If I changed the lease application to just one water right, I would have to withdraw the three current lease applications and submit one new lease application. Let's just move forward with the three lease applications.

I tried to recall that message right after I sent it. And, I haven't sent the letter.

I only find lease a agreement for 36-16469. So I am trying to determine the status of the other two.

Sandra,

According to Idaho Code 42-351, full irrigation in the past 5 years under 36-16469, 36-16467 and 36-16471 would be considered illegal because portions of these water rights have been leased to the Idaho Water Supply Bank since September 29, 2008. Please continue to process the current lease and rental applications involving 36-16469, 36-16467 and 36-16471.

Thank you,

Subject: water supply bank lease for Irene Vandervegt Gibson

Hi Greg, I have reviewed the applications to lease rights 36-16469, 36-16467 and 36-16471 into the bank. I don't find evidence that they have been irrigated the past 5 years. I am sending a letter to Irene Vandervegt Gibson about the water supply bank lease of three rights. The attachment to this email is a copy of the letter. If you find evidence of irrigation from 2008 through 2013 please let me know.

Evaluation of overall mitigation requirements per reach Steady State and Transient State, and Off-Setting Benefits (Sum of reach debits only where mitigation is required and credits)

Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits, only where mitigation is required (dark yellow) and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero.

Steady state analysis represents permanent mitigation requirements at future steady state (or last timestep from the ESPAM Transfer Tool model run).

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

Evaluation of transient state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

Evaluation of Permanent Mitigation Efforts (non-use, acreage consolidation) in Addition to Off-Setting Transfer Benefits - Steady State Evaluation Only

Set Aside 1 (Non-Use/Desiccation):

WR No	Div Rate (CFS)	Con Vol (AF)	No. of Irr Acres	Priority Date	POD Location	Dedicated Vol AFA/ AFT	Model Node

Re: Westchester Rentals

Dear Mrs. Skaggs:

Westchester Group Investment Management Inc. is submitting two rental applications at this time.

The first rental proposes to rent 136.1 acres (2.17 cfs/556.8 afa) from water rights 36-2254A, 36-2284 and 36-8401 that are currently owned by Sunrise Organic Dairy. The point of diversion (POD) for these three water rights is located in ESPA model cell 74043. The central ESPA model cell for the Westchester farm and PODs is 67049. The rental period will be for the 2014, 2015 and 2016 irrigation seasons. Water Rights 36-2254A, 36-2284 and 36-8401 have leased to the Idaho Water Supply Bank since 2006. ESPA model analysis indicates that no mitigation will be required for this rental.

The second rental proposes to rent 99.8 acres (2.0 cfs/399.0 afa) from water rights 36-16467, 36-16469 and 36-16471 that are owned by Irene Vandervegt Gibson. The POD for these water rights is located in ESPA Model cell 73050. The central ESPA model cell for the Westchester farm and PODs is 67049. The rental period will be for the years 2014, 2015, 2016, 2017 and 2018. Water rights 36-16467, 36-16469 and 36-16471 have been leased to the Idaho Water Supply Bank since 2008. ESPA Model analysis indicates no mitigation will be required for this transfer.

The combined ESPA Model results for the two rentals indicates that no mitigation will be required for these two rentals. An aerial map of the proposed rental places of use is attached to this letter.

The original signature pages will be submitted to the Water Supply Bank when they have been received at Brockway Engineering.

Re: Westchester Rentals

Dear Mrs. Skaggs:

Westchester Group Investment Management Inc. has submitting two rental applications. One of the rental applications proposes to rent 99.8 acres from water right 36-16467, 36-16469 and 36-16471 for five years. The five year lease application for 36-16467 is being submitted with this letter.

The original signature pages for the rental applications are being submitted at his time.

Thank you for your assistance and if you have questions or comments, please don't hesitate to call.

Sincerely,

Greg Sullivan, M.S., Engineer
