Subject: City of Meridian Water Right Permit No. 63-31281 (City Well #23)

Dear Shelley,

With this letter I transmit the Proof of Beneficial Use Licensing Examination for City of Meridian water right Permit No. 31281. As we recently discussed, proof was submitted by the City on September 29, 2006. Hydro Logic, Inc. conducted the field licensing examination on December 22, 2011 but it was not prepared and submitted to the Department until now.

We have attempted to provide all information necessary for the Department to process this Permit but we remain available for any questions or to provide any additional data IDWR may find necessary.

The City's municipal Well #23 does not meet one of the conditions of approval of the Permit because of a difference in the water-bearing zone originally identified to be appropriated. We have developed and supplied a significant quantity of supporting information concerning this change to assist your staff in its deliberation as to whether the change warrants re-advertisement (which the City contends is not necessary). Please let us know your decision with respect to this.

In addition to the printed document, I have prepared a digital copy in PDF-format as a courtesy for Department files. I have transmitted the digital copy separately by e-mail. I hope you find this helpful.

Thank you for your guidance in preparing this document.

Respectfully,
Ed Squires

c: Kyle Radek, Assistant City Engineer, City of Meridian, Idaho
