RE: Water Right License 29-7607

Dear Water Users,

It appears that there could be some confusion as to the nature of ownership of water right 29-7607 and to which lots have right to obtain water from which wells. I thought it might be some benefit to go over what water right license 29-7607 authorizes.

On September 27, 2011, the Department issued water right license 29-7607 in the name of *Lacey Vista Acres Water Corp.* License 29-7607 authorizes diversion of ground water from three (3) wells. Two (2) of the wells (one (1) primary and one (1) backup) are located on Lot 21B, **Lacey Vista Acres**. One (1) well is located on lot 9A, **1st Addition Lacey Vista Acres**. The license also authorizes use of water from all 3 of the points of diversion (wells), for domestic purposes, on all 60 homes (30 in **Lacey Vista Acres** and 30 within **1st Addition**).

License 29-7607 can supply water to all 60 lots from one well, or a combination of all three wells. If the contaminated well on Lot 9A, **1st Addition Lacey Vista Acres** is never brought back online, the license authorizes water to continue to be diverted to all 60 lots from the wells located on Lot 21B, **Lacey Vista Acres**.

That said, water right 29-7607 does not grant access or easement to any of the three wells identified as valid points of diversion.

I don't know if this letter will provide you with any additional information than you already had, but I guess what I am trying to point out is that the water right does not distinguish a difference in right to use water from any of the wells, or on either subdivision.

Respectfully submitted,

Craig L. Saxton
