RE: Amendment of Permit 25-7429

Dear Mr. Schoenenberger:

As you are aware IDWR has been working on licensing active permits that were issued in the 1980s and 1990s. I have just completed the review for Permit 25-7429 which is for a small stockwater system developed near Grays Lake. Permit 25-7429 was issued in the name of Wayne and Aileen Freckleton. Bonneville County taxlot data indicates that NGW Ranch LC is the current owner of the property. Rather than tracking down the Freckletons, it is likely easier to contact you about the water right.

The point of diversion and place of use described in Permit 25-7429 were listed as the NESE of Section 12, T03S, R42E. However, the stockwater system was actually developed in the NWNE of Section 13, T03S, R42E. Therefore, the permit must be amended before a water right license can be issued.

I have included a map of the stockwater system and the field exam that was prepared for Permit 25-7429. If the amendment correctly describes the stockwater system that was developed, please sign the amendment and return the signed form with the appropriate filing fee (\$100).

I appreciate your attention to this matter. Once the license is issued, we will be able to update the ownership of the water right. I've also included a change of ownership form. If you would like to update ownership at this time, please include a copy of the deed(s) tracing ownership back to the Freckletons. The filing fee for the ownership change is \$25. Both fees can be paid in a single check. We will issue the final water right license once the amendment is received. If you would like to discuss this water right in greater detail feel free to give me a call.

Sincerely,

James Cefalo
