Subject: Licensing of Permits 22-13917 & 22-13918 & Mitigation/Leased Right 31-2327B

Jeff,

I am confirming our conversation yesterday afternoon regarding Permits 22-13917 and 22-13918 and Right 31-2327B that provides mitigation for these permits. The Beneficial Use Field Exams have been received for the permits and they will be licensed in turn. Once the development under the permits has been confirmed, the mitigation requirement defined, and the permits licensed, we expect to update Right 31-2327B to reflect the portion of the right dedicated to mitigation use for the licensed rights as you proposed.

All of Right 31-2327B is currently leased to the Water Supply Bank (Bank) and not available for rental. Once the mitigation portion of the right is identified, the right holder can request release from the Bank of the entire right or just the mitigation portion as they choose. If only a portion of the right is requested released from the Bank, a new Application to Lease a Water Right to the Bank is required to identify the new proposed lease acres under the remaining irrigation use.

This is how we propose to move forward with these rights. There may be unknown factors identified through processing that could result in different actions. You and the right holders will be informed as the licensing process is completed. If you have any further questions or comments, please let me know.

Pam
