RE: Water Appropriation Permit 94-7535

Request for Information

Dear Permit Holder:

In 2011 IDWR issued permit 94-7535 authorizing the development of a right to divert 0.03 cfs of water from North Fork Coeur D'Alene River, tributary to the Coeur D'Alene River, within Lot 4 of Section 21, Township 50 North, Range 04 East, B.M., for irrigation use.

The final step in the water appropriation process is the issuance of a Water Right License. By issuing a license, IDWR recognizes that water has been put to beneficial use in accordance with the permit. For your convenience, I am enclosing a copy of permit(s) listed above.

In an attempt to expedite the licensing process, IDWR would like for you to provide the following information regarding your permit:

Point of Diversion Information:	Photographs of the pump and the point of diversion. If possible, GPS coordinates of pump location – latitude/longitude. Please indicate pump location on provided map.	
Pump Information:	Make, Model, Serial Number, and Horse Power of Pump or a picture of the pump plate	
Sprinkler Information:	Size of pump outflow and of water line(s). Size, type, number of nozzles and gallon per minute of sprinklers.	

Permit 94-7535 includes the following conditions:

#5 A fish screen of 0.25 inch or smaller mesh shall be installed and maintained at the point of diversion.

Please provide:

Photographs of:	The fish screen on the pump intake or other fish passage restriction device.	
Screen Design Information:	Must be 0.25 inch or smaller mesh.	

The photographs submitted should be of sufficient number and at sufficient angles in order to confirm compliance with the conditions listed on the permit.

In addition, I have enclosed a map of the identified Place of Use for Permit 94-7535. Based on the permit, a maximum of 1.0 acres can be irrigated. The total lot size of Lot 4, Block 1, Lot 5, Campbell Meadows per county parcel information is 1.8 acres. On the map provided, 1.0 acres of irrigation have been identified. If acreage is being irrigated in a different location, please indicate where on the provided map. Please note that impermeable surfaces such as trailer pads, homes, sheds and driveways cannot be included in the licensed irrigated acreage and will be subtracted from the maximum acreage.

You can request that IDWR personnel go into the field to collect this information accompanied by yourself or your representative. For this to occur, please contact me by July 30, 2014. If you would like your representative to be present, please have the name, telephone number, and email of your representative. Be aware that you and/or the representative must be available to be contacted and for scheduling of the required visit within a timely manner.

Please provide the requested information by July 30, 2014. If I do not receive the requested information or have been contacted by you by July 30, 2014, I will take action to void your permit under the provision of Section 42-219(8) of the Idaho Code.

If you have any questions, please contact me at 208-287-4938. Thank you for your attention to this matter.

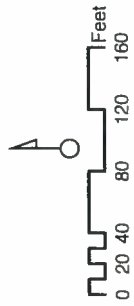

Respectfully,

A handwritten signature in cursive script, appearing to read "Danielle Favreau".
