Subject: Protest of App for Permit 63-33913 (Shirley Christensen)

Attn: Chas. F. McDermott –

I understand that you have come to an agreement with Mrs. Christensen's son that will remove your concerns regarding their new proposed well for irrigation purposes. In order for the department to continue processing of the application, your protest needs to be formally withdrawn.

I am enclosing a document you can use for this purpose. Somewhere on the document, please include a brief summary of the agreement reached between Black Canyon Irrigation District and Mrs. Christensen's son, Mark Coombs. After filling it out and signing it, please return it to our office. We have to have an original signature; the form can't be faxed or emailed to us.

Thank you for your help in this matter.

Sharla Curtis
Sr. Water Resource Agent

P.S. The following conditions will be placed on any approval document. The first condition is in response to your protest and subsequent withdrawal of protest. The second is the standard condition we apply for irrigation use from ground water for any such filing over .24 cfs.

- 1) The diversion and use of water described in this right may be subject to additional conditions and limitations agreed to by the protestant and the right holder under a separate agreement to which the Department is not a party. Because the Department is not a party, the Department is not responsible for enforcement of any aspect of the agreement not specifically addressed in other conditions herein. Enforcement of those portions of the agreement not specifically addressed in other conditions shall be the responsibility of the protestant and the water right holder.
- 2) After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
