Sharla,

Our plan is to have the depth of the proposed well 250 plus feet. This would protect more shallow water rights in the surrounding area.

Please refer to the attachment for existing wells.

Thank you for your attention regarding this matter.

Mark,

I have circled the area which is ½ mile radius around the well described on the application for permit. The circled area is where you need to show locations of other wells and document your plans to prevent injury.

If you have problems opening the file, let me know.
