PROOF ACKNOWLEDGEMENT LETTER

RE: Permit No. 65-23375

Dear Permit Holder(s):

The Department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. During my review of your proof and water right permit, I found one condition of this permit that may not have been complied with.

Condition no. 7 of this permit which states:

"The right holder shall maintain a measuring device and lockable controlling works of a type approved by the Department in a manner that will provide the water master suitable control of the diversion(s)."

I recommend that this condition be complied with immediately and prior to the field examination. Enclosed is a copy of this permit for your information. If you feel this requirement is unnecessary you may request in writing to the Department that the requirement be waived. . In addition you must contact the watermaster about his need for this requirement. If he agrees that the measuring device requirement is unnecessary, request that he/she provide the Department with written agreement that the requirement can be waived at this time. Upon receipt of your request and his acknowledgement the Department will issue an order waiving the requirement at this time.

Please be advised that Section 42-248, Idaho Code, requires you or the owner of this water right to maintain current ownership and address records on file with the department. Forms to file a change of ownership of a water right and/or a change in the address of the water right owner are available from any department office.

The next step in the process of developing a water right is for the Department to conduct a field examination to determine and confirm the use being made of the water. If you have any questions concerning the field examination, please contact the Western Regional Office of the department in Boise, Idaho 208-334-2190.

Sincerely,

Darla Block
Technical Records Specialist
