RE: Additional information request for licensing permit number 47-7485

Dear Mr. Wedland:

I have been asked to go through some of our older files and try to issue a license for these water rights. A Mr. Jack L. Donner filed a water right permit in 1983 for recreation, aesthetics, and hydropower use. This permit was then assigned to you in 1994. Two field exams were done on this water right permit. The first exam was done in 1989 and the second was completed in 1998. These exams raised questions on ownership of the properties and what the actual water use was for this permit.

In order to complete the licensing for this permit, I would like to ask if you could clearly mark on the enclosed map the location of the point where the water is diverted, any ditches or pipelines used to convey or transport the water, the location of where the water is used, and write a brief description of how the water is used.

I know it has been a long time since this permit was initial filed and field examined, but if I can get this information from you, I am hoping to bring this permit to resolution as quickly as possible. If you could return the above information to me within the next 14 days, it would assist me in processing this water right as efficiently as possible.

Respectfully,

Daniel A. Nelson
Staff Hydrologist

Enclosure: Aerial photo of property.

Point of diversion was
moved to the north on my
property from the headgate on
south property. New Point of
Diversion has a dam with
culvert for this purpose.
Purpose of water use is power
generation.
