Transfer proposes to return two water rights associated with a proposed dairy back to irrigation of a PPU. Water rights 43-13604 and 43-13578 were split for a proposed dairy under transfer 72670, the dairy was never constructed and the owner would now like to return the water rights back to irrigation and include them with the other irrigated acres on the farm. The change in the nature of use will return the commercial and stock water use of WR 43-13604 to original amount of irrigation allowed by the parent water right. The other 16 water rights currently associated with the PPU are included in this transfer because the PPU will now include the additional irrigated acres from the two rights.

TRANSFER 79229

MEMORANDUM

Date: May 7, 2014
To: Transfer 79229 File
From: Nathan Erickson
Re: Evaluation of Sufficiency of Information Submitted

Transfer proposes to return two water rights associated with a proposed dairy back to irrigation of a PPU. Water rights 43-13604 and 43-13578 were split for a proposed dairy under transfer 72670, the dairy was never constructed and the owner would now like to return the water rights back to irrigation and include them with the other irrigated acres on the farm. The change in the nature of use will return the commercial and stock water use of water right 43-13604 to the original amount of irrigation allowed by the parent water right (124 acres, 1.74 cfs, and 496 AF). The other water right 43-13578 (40 acres, 0.17 cfs, and 82.1 AF) was intended to be an irrigation water right on the dairy but will now be included in the PPU. The other 16 water rights currently associated with the PPU are included in this transfer because the PPU will now include the additional irrigated acres from the two water rights.

Several of the wells added to the irrigation system under a previous transfer (74518) have not been constructed. This transfer makes no changes to the points of diversion, but it is expected that by filing the transfer the clock for drilling these new wells will be renewed. The wells are located outside the Smooth Model Boundary of the ESPA and outside of any current water districts. They are also located just inside the north boundary of the Raft River Critical Groundwater Area. Ultimately the proposed transfer will only undo a previous transfer and renew the ability to drill previously advertised points of diversion, for this purpose it is expected that there will be no hydrologic impact and advertising is not required for this transfer. The approximate location of the irrigated land is 12 miles north of Malta and 3 miles east of Interstate 84.

- **Authority to File:**
IDWR Records show the rights in the name of the applicant, Murphy Land CO LLC. Application states the lien holder on the property is RABO Agriculture Finance Mortgage. RABO Agriculture Finance has provided a letter approving the transfer and the change to the nature of use.
- **Water Right Validity:**
Water rights 43-2471, 43-2472, 43-2475, 43-2488, 43-2489, 43-2504, 43-2519, 43-4199, 43-13351, 43-13352, 43-13577, 43-13578, 43-13603, and 43-13604 were decreed in the SRBA on 5/4/2004. Water rights 43-2505, 43-2516, 43-2517, and 43-2575 were decreed in the SRBA on 7/12/2004. Recent aerial and satellite imagery indicate the property involved with this transfer appears irrigated.
- **Injury to Other Water Rights:**
None anticipated, but the wells should have possible measurement and reporting requirements to prevent any injury or enlargement of the rights.
- **Enlargement of Use:**
None anticipated if measuring and reporting are required in the future.

- **Local Public Interest:**
No negative impacts anticipated.
- **Beneficial Use/Conservation of Water Resources:**
Proposed use is recognized as a beneficial use of water.
- **Effect on the Economy of the Local Area:**
None Anticipated.
- **Effect on Agricultural Base of the Local Economy:**
None Anticipated.

Review of the application finds there is no clear inconsistency with criteria set forth in Section 42-222 Idaho Code preventing processing of this application.
