RE: Water Right Permit No. 86-11909

Dear Mr. Auer:

Per our telephone conversation on June 4, 2014, I am enclosing an application of amendment of permit 86-11909. To recap our discussion a little, upon reviewing you recently submitted application for permit, I discovered that the point of diversion legal description on License 86-11909 is incorrect. As we discussed, the map you were sent shows the Spring location accurately, but the actual license doesn't. It appears that the permit described the spring location in the 40 acre tract to the north of where it is actually located. In order to correct this error, two things need to happen:

1. You need to amend the permit record for 86-11909 to accurately describe the location of the spring (point of diversion).
2. IDWR will have to issue a replacement license that will supersede the license issued on May 12, 2014. IDWR must issue the replacement license before **June 23, 2014**.

For your convenience, I have enclosed an Application for Amendment of permit 86-11909 along with a map that I hope will help explain the problem.

As I mentioned on the phone, there is a fee associated with the amendment. The filing fee is \$100.00. Please note, we would have had to go through the amendment process even if we had discovered the discrepancy in the point of diversion locations before license 86-11909 was issued with the wrong description. But I am sorry to drop this on you after we had issued the license and you thought we were all done. However, correcting this error will save the increased expense of having to file a transfer down the road (\$250 minimum).

Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within **14 days**. It is critical that the amendment is submitted with enough time to allow us to process and issue the replacement license before **June 23, 2014**.

If you have any questions, please call me at 208.287.4916.

Respectfully submitted,

Craig L. Saxton
