Subject: 65-22950 and 65-22953 water rights

Dana,

We will be sending out an "Amended Amendment" for both 65-22950 and 65-22953 to show the lots as BLM Land Surveyor has stated below.

Thanks,

Sandy,

You have provided diagrams showing two parcels in T. 9 N., R. 5 W., sections 29 and 32. Both parcels are located outside the original meander line on what appears to be accreted land. You can describe them as being located either in section 29, Lot 2 and the accretions attached thereto, or Lot 3 section 32, and the accretions attached thereto. If there is some question about ownership of the accretions due to a different owner in the adjoining upland parcels then a private surveyor could develop partition lines across the accretions and also provide a metes and bounds description to better locate the application. If the accretions in front of each application are owned by a single owner then partition lines are not necessary.

Hi Byron,

I have been trying to get an amendment signed by a water right holder, but I need to confirm the actual legal description that should be used on the license, since along the river's edge there are irregular shaped quarter-quarters. Michael Ciscell thought that you might be able to help me.

Here are the two water rights that I am having trouble with:

65-22950, T9N R5W Sec 29

- (1) Can you please confirm whether or not the POD is located in SWNE2 or should it be listed as just Lot 2?
- (2) Can you please confirm whether or not the POU is located in just SWNE2 or should it be listed as just Lot 2?

65-22953, T9N R5W Sec 32

- (1) Can you confirm whether or not the POD is located in NENW or NENW3?
- (2) Can you confirm whether or not the POU is located in NENW or NENW3?

Thank you so much,

Sandy Hemenway
