INTEROFFICE MEMORANDUM

TO: 65-22651 LICENSING FILE
FROM: VICKY MUSIC
SUBJECT: FIELD EXAM
DATE: MAY 5, 2014
CC:

This permit qualifies for an in-house field exam. However, I conducted an on-site exam to verify the location of the POD and use. The permitted source is a spring and the use is stockwater for a total of 85 head range cattle and horses. Proof was timely filed. Joy Sisler accompanied me on the exam.

The source is a spring which was not flowing the day of the exam. The spring box is a concrete vault, 5 feet in diameter and about 3 feet deep. The floor of the vault is concrete. There are 2 pipes, a 2 inch pipe through which the water flows into the vault, and a 1 inch drain pipe, to drain excess water back into the ground. Ms. Sisler stated that the spring begins to flow in June, and the flow is greatest in the autumn of each year.

GPS coordinates for the spring are: N 43.88364, W -116.57701.

Cattle were seen the day of the exam. The flow recommended for licensing is the permitted 0.03 cfs. The volume recommended for licensing is 1.1 af based on the following calculation:

12 gallons per day IDWR standard for range cattle & horses x 85 head x 365 days a year / 325850 gallons per af = $372300 / 325850 = 1.1$ af

Permit conditions have been met.

View of spring box. Payette River is in the background.

Re Permit To Appropriate Water No. 65-22651

Dear JOY OR MAGGIE SISLER:

The permit referenced above was issued for 0.03 cfs from a spring for stockwater use. This letter is to request that you call me to schedule the field exam for this permit. A field exam is required by Idaho law before a license can be issued, at which time it becomes a water right. The license is the end product needed for continued water use.

Please have available at the exam someone familiar with the system and its construction, as well as the pump and motor specs, if applicable.

Please call me at 208.334.2190, to set an appointment for the exam that I hope to conduct in May of 2014. Failure to respond to this letter request by **May 7, 2014**, may result in the permit being voided or a license issued for less than the permitted amount. Thank you.

Sincerely,

Vicky Music
Sr. Water Resource Agent
