Re: Permit No. 63-31526

Dear Mr. Pippett:

The permit reference above is for the soaking pool, the source of which is two geothermal springs. You accompanied me on the field exam in 2013. My field notes indicate that you thought the pool dimensions were 15' x 15' x 4', but were not sure. Will you please verify the pool capacity?

Also, the Department must have some information with which to determine an annual volume used for the soaking pool. For instance, is the water pumped continuously into the pool, and is the water discharged continuously from the pool into the creek? Or, is there a pumping schedule for the pool? How does the HOA determine when to "top off" the pool?

Please submit the information to me in writing by April 14, 2014. Failure to provide the information by the deadline may result in the permit being voided or a license issued for less water than is being used. Please send it to my attention and thank you.

Sincerely,

A handwritten signature in black ink, appearing to read 'Vicky Music'.

Vicky Music
Sr. Water Resource Agent
