

MEMORANDUM

Date: March 21, 2014
To: Water Right File 63-12555
From: kwalker 
Re: License Prep

In review for licensing I found field headgate volume to be 4.5 afa and consumptive use volume to be 3.5 afa. I recommend we allow 18.0 afa for field headgate volume and 14.0 af of storage water to provide for mitigation of these lands. Permit was issued using 3.0 afa for consumptive use but current standards show 3.5 so this is what I have based license on.

Re: In-house exam

The name of the applicant, the Caldwell First Assembly of God Church, appears differently in the back file [both with and without "Caldwell"], and the assessor layer on ArcMap states the taxlot is owned by the Assembly of God Church of Caldwell. So, I recommend leaving the name as it appears on the permit.

The place of use permitted is 6 irrigated acres in the NESE of Section 22, T4N R3W. However, I found less than 4 acres irrigated. I recommend licensing 4 acres at the standard 0.03 cfs for small acreages, for a total 0.12 cfs

Additionally, a permit amendment is needed to correct the POU as follows.

T4N R3W Section 22 NESE 1 acre
T4N R3W Section 23 NWSW 3 acres

Regarding volume:

$Vir = 4 \times 3 = 12 \text{ af.}$

$Vdr = 0.12 \times 260 \times 1.9835 = 61.9 \text{ af}$

The volume recommended for licensing is the lesser of the Vir and Vdr calculations. I recommend using 3 af/acres because Gary Spackman used it to determine the volume of storage water the church would be required to purchase each year for mitigation.

I emailed the Bosie Rvier Watermaster, Rex Barrie to find out if the permittee has been purchasing mitigation water as required.

There are 2 well logs for the same well because the well was deepened, as indicated on the 1999 well log.

63-12555 -- 2013 NAIP. Caldwell First Assembly of God Church. POD [well] shown in green. Irrigated POU outlined in blue.

INTEROFFICE MEMORANDUM

TO: LICENSING FILE 63-12555
FROM: VICKY MUSIC
SUBJECT: CONDITIONS OF PERMIT
DATE: MARCH 4, 2014
CC:

One of the conditions of this permit is that the permittee purchase 18 af of storage water to mitigate for the consumptive use associated with the irrigation of 6 acres. I contacted Watermaster Rex Barrie, who relayed that the permittee had not purchased water since he has been Watermaster [2008].

I sent the permittee a letter regarding this and Gerald Crownover called me back. He really did not understand the situation and stated the church thought they had done all that they were supposed to do, but he would contact the Watermaster. I also told him that I was going to recommend 4 acres for licensing, so purchases 12 af would be adequate.

Watermaster Rex Barrie called me and said that he met with the permittee this morning, and they purchase 18 af mitigation water. He said they also discussed the measuring device requirement. They did not install one. He advised them to work with Steve Lester or John Westra to use power records instead. However, it is not a requirement so I will call the permittee and let them know the condition states a device is to be installed upon request by IDWR.

RE: Water Right Permit No. 63-12555

Dear Permit Holders:

The Department of Water Resources is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, the Department confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code. Before a license can be issued, your permit must be amended to depict your water use as it was actually developed.

Based on the examiner's report, the following elements were developed differently than described on your permit:

✓ **Place of Use – See enclosed layout**

The enclosed Application for Amendment form depicts the elements of the water right as they will appear on the license when it is issued. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it with the \$100.00 filing fee within 14 days.

If you have any questions, please call me at 334-2190.

Sincerely,

KAY WALKER
Sr. Water Resource Agent

Re: Permit to Appropriate Water No. 63-12555

Dear CALDWELL FIRST ASSEMBLY OF GOD CHURCH:

This letter is in follow up to our recent conversation regarding permit conditions, and my letter of January 25, 2014, which set a deadline of February 24, 2014, for additional information. The new deadline is March 25, 2014.

Please submit the requested information so that IDWR can continue the licensing process. Failure to submit the information may result in the permit being voided. Fees are not refunded for voided permits. As always, please call me at 208.334.2190 if you have questions or concerns. Thank you.

Sincerely,

Vicky Music

Re: Permit to Appropriate Water No. 63-12555

Dear CALDWELL FIRST ASSEMBLY OF GOD CHURCH:

The permit referenced above, issued for irrigation of 6 six acres from ground water, has been assigned to me for licensing. A license is required for continued use of the water. A copy of the permit is attached to this letter.

Permit condition no. 6 states,

As mitigation for the consumptive use of water under this right, the right holder shall annually lease 18.0 acre feet of storage water within Boise River storage facilities for release into the Boise River by the watermaster of Water District 63 throughout the irrigation season. The right holder is not authorized to divert water under this right each irrigation season until storage water is leased.

I can see from aerial photographs of the church property that from 2004 to 2013 that 3 to 4 acres were irrigated each year. However, Watermaster Rex Barrie, in a recent correspondence, stated they the Church has not contacted him to seek mitigation water since he assumed the position of Watermaster in 2008. Because the Church has not complied with the conditions of the permit, I request that you call me to discuss this condition and the Church's intent, and to provide the same in writing.

Please submit the requested information so that IDWR can continue the licensing process. Alternately, you may seek additional time up to provide the information. The requested information or a request for more time to obtain the information must be received in writing by February 24, 2014. Failure to submit the information may result in the permit being voided. Fees are not refunded for voided permits. Thank you.

Sincerely,

Vicky Music
Sr. Water Resource Agent

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 63-12555

Priority: 11/15/1999

Maximum Diversion Rate: 0.12 CFS

This is to certify, that CALDWELL FIRST ASSEMBLY OF GOD CHURCH
821 N 16TH AVE
CALDWELL ID 83605

has applied for a permit to appropriate water from:

Source: GROUND WATER

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/01 to 11/15	0.12 CFS

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER NE $\frac{1}{4}$ SE $\frac{1}{4}$ Sec. 22, Twp 04N, Rge 03W, B.M. CANYON County

PLACE OF USE: IRRIGATION

Twp	Rge	Sec	NE				NW				SW				SE				Totals
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	
04N	03W	22													6.0				6.0

Total Acres: 6

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before **March 1, 2003**.
2. Subject to all prior water rights.
3. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code.
4. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to determine the amount of water diverted from power records and shall annually report the information to the Department.
5. As mitigation for the consumptive use of water under this right, the right holder shall annually lease 18.0 acre feet of storage water within Boise River storage facilities for release into the Boise River by the watermaster of Water District 63 throughout the irrigation season. The right holder is not ~~authorized to divert water under this right each irrigation season until storage water is leased.~~ *
6. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 4.5 afa per acre at the field headgate for irrigation of the lands above.
7. Water bearing zone to be appropriated is 52 to 212 feet.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 18th day of March, 2002

Vicky,

I have no knowledge of any rentals from the pool. They may have leased from Lee Sisco back then. I started in 2008 and have never heard from them.

Subject: Caldwell Assembly of God Church 63-12555

Hi Rex –

I am working on licensing this church water use, and I see there is a condition that requires that they purchase, for mitigation of the consumptive use of irrigating 6 acres, 18 af of storage water. Our records indicate the last knowledge the Department has of any purchase is in 2001. Has the church been purchasing water each year?

It appears from aerials that they do not irrigated more than 4 acres, so the mitigation requirement will change to 12 af.

Attached is a copy of the permit, and a 2013 aerial of the POD/POU.

Thank you.
Best Regards,

Vicky Music
