Evaluation of overall mitigation requirements per reach Steady State and Transient State, and Off-Setting Benefits (Sum of reach debits only where mitigation is required and credits)

Carry out one way analysis. If reach depletions go up, it is a debit, if they go down, it is a credit. Sum all debits, only where mitigation is required (dark yellow), and all credits (light yellow). Mitigation is required for the full amount of the summed values if greater than zero.

Steady state analysis represents permanent mitigation requirements at future steady state (or last timestep from the ESPAM Transfer Tool model run).

Transient state analysis represents mitigation requirements for the worst or maximum time step in the model run.

Evaluation of transient state mitigation requirement is not comprehensive across all time steps. Instead this evaluation finds the maximum stream depletion following the start of the transfer and looks at depletion amounts from that time step. In many instances this depletion is greater than the depletion associated with the steady state condition or final time step. This evaluation is merely an indicator of whether transient depletions must be considered, not an indicator of all transient impacts.

Evaluation of Permanent Mitigation Efforts (non-use, acreage consolidation) in Addition to Off-Setting Transfer Benefits - Steady State Evaluation Only

Dear Mrs. Palmer:

I have attached the original letter that is signed by William and Joanne Toeys informing the Department that the Toeys are not expecting payment from the Water Supply Bank for 2014.

If you have any other questions or concerns about this matter, please give me a call and we can discuss it.

William and Joanne Toevs purchased the 305.0 acres located in Township 5 South Range 31 East Section 16 S1/2 November 28, 2012 from Superior LLC. At the time of the purchase, Lance Funk had entered into a farm lease agreement with Superior LLC to manage the farm from November 2008 through October 2018.

Water rights 35-13609, 36-7246M and 36-7632A are currently located on the 305 acre property and are authorized to irrigate 264.0 acres. Water rights 35-13609, 35-7246M and 36-7632A were leased to the Idaho Water Supply Bank on 1/24/2013. The term of the lease will continue until 12/31/2015.

Water rights 35-2084, 35-7699, 35-13578 and 35-13588 have been rented from the Idaho Water Supply Bank to cover the 264.0 acres of farm ground covered by existing pivots from 4/18/2013 through 12/31/2015.

Both the lease and rental of water rights on the Toevs 305.0 acres are active and have been used to facilitate proper irrigation consistent with local farming management practices.

William and Joanne Toevs receive annual monetary payment for water and property used on or from the 305.0 acres from Lance Funk based on a private agreement. William and Joanne Toevs understand and expect no rental payment from the Idaho Water Supply Bank from 35-13609, 36-7246M and 36-7632A for 2014 and 2015.

Sincerely,

William Toevs

*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$11,832.00 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 696.0 acre-feet. Since you have a private agreement with the lessor of the rights 35-7246M, 35-7632A and 35-13609, you are only obligated to pay the 10% administrative fee on those rights. The fee that will be retained by the department to offset administrative costs is 10% of the total or **\$1,183.20**. The balance of the fee, **\$4,528.80** will be paid to the lessors of water rights 35-14014, 34-14015, 43-13595 and 43-13597.

Please send a check for \$5,712.00 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing.

If you have any questions, please contact me at (208) 287-4944.

Re: Review & Analysis of Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: On behalf of Lisa and Lance Funk, Greg Sullivan of Brockway Engineering submitted a rental application for 2014 in the name of Burgemeister 2.

The proposed place of use was irrigated last year with a rental agreement and this year's rental will duplicate last year's need. Note that the proposed point of diversion is already authorized under 35-14082, 35-14082, 35-14090, and 35-14093, and 35-14317 thru 35-14320. The WMIS # for the proposed point of diversion is 1001372.

AUTHORITY TO FILE: According to tax records, Lance Funk owns that land at the proposed rental place of use. In addition, Lance and Lisa Funk own the water rights that divert from the proposed rental point of diversion.

WATER RIGHT VALIDITY: All the water rights associated with this rental are valid and leased to the bank.

INJURY TO OTHER WATER RIGHTS: Modeling has been done for this rental. Michele Edl has checked the modeling for this rental and agrees that no injury will occur under this rental.

ENLARGEMENT OF USE: No enlargement is evident through the rental.

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES: The rental appears consistent with the conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS: This rental is within water district 120. When James Cefalo provided regional/watermaster input, he did not have any concerns.

Re: Lance Funk Rentals

Dear Mrs. Skaggs:

I have attached six rental applications and three lease applications.

The first rental application (Burgermeister 302 acres) is to supersede and existing/approved rental for 302 acres. The reason for the change is because of the 116.0 acres under 35-7788B. Water right 35-7788B caused a considerable amount of trouble for us try to get everything covered for the 2013 irrigation season. It is necessary that 35-7788B be released from the Idaho Water Supply Bank. I have submitted a release request form to Northern Ag representatives to be signed. As soon as I receive the original. I will mail it to you. Please make sure that 35-7788B is not rented to anyone for the 2014 season.

Water rights 37-7618 and 37-7621 are currently leased to the Water Bank through 12/31/2013. The lease applications propose to lease the two water rights through 12/31/2015.

The second rental application is for the Huse 1 farm for 171.0 acres. This rental will be for the 2014 and 2015 irrigation season. ESPA modeling analysis is attached to the rental application. This application proposes to rent portions of water rights 35-13609, 35-7246M, 35-7632A, 43-13595 and 43-13597.

The third rental application is for the Huse 2 farm for 367.3.0 acres. This rental will be for the 2014 irrigation season. ESPA modeling analysis is attached to the rental application. This application proposes to rent portions of water rights 35-14014, 35-14015, 43-13595 and 43-13597.

The fourth rental application is for the NPVR farm for 145.0 acres. This rental will be for the 2014 irrigation season. ESPA modeling analysis is
