

State of Idaho
Department of Water Resources
Permit to Appropriate Water

NO. 63-33911

Priority: February 03, 2014

Maximum Diversion Rate: 2.40 CFS

This is to certify, that A J P FARMS INC
23546 HARTLEY LN
MIDDLETON ID 83644

And

JLP FARMS INC
ATTN JERRY PAYNE
27333 FOUNTAIN RD
PARMA ID 83660

have applied for a permit to appropriate water from:

Source: GROUND WATER

and a permit is APPROVED for development of water as follows:

<u>BENEFICIAL USE</u>	<u>PERIOD OF USE</u>	<u>RATE OF DIVERSION</u>
IRRIGATION	03/01 to 11/15	2.40 CFS

LOCATION OF POINT(S) OF DIVERSION:

GROUND WATER NW1/4NE1/4 Sec. 18, Twp 05N, Rge 04W, B.M. CANYON County

PLACE OF USE: IRRIGATION

Tw	Rge	Sec	NE				NW				SW				SE				
			NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	NE	NW	SW	SE	Totals
05N	04W	18	40.0	40.0	40.0	36.0									30.0				186.0

Total Acres: 186

CONDITIONS OF APPROVAL

1. Proof of application of water to beneficial use shall be submitted on or before **June 01, 2015**.
2. Subject to all prior water rights.
3. This right does not grant any right-of-way or easement across the land of another.
4. Right holder shall comply with the drilling permit requirements of Section 42-235, Idaho Code and applicable Well Construction Rules of the Department.
5. After specific notification by the Department, the right holder shall install a suitable measuring device or shall enter into an agreement with the Department to use power records to determine the amount of water diverted and shall annually report the information to the Department.
6. The Director retains jurisdiction to require the right holder to provide purchased or leased natural flow or stored water to offset depletion of Lower Snake River flows if needed for salmon migration purposes. The amount of water required to be released into the Snake River or a tributary, if needed for this purpose, will be determined by the Director based upon the reduction in flow caused by the use of water pursuant to this permit.

State of Idaho
Department of Water Resources
Permit to Appropriate Water
NO. 63-33911

7. The right holder shall make full beneficial use of all surface water rights available to the right holder for irrigation of the lands authorized to be irrigated under this right. The right holder shall limit the diversion of ground water under this right to those times when the surface water supply is not available or the surface water supply is not reasonably sufficient to irrigate the place of use authorized under this right.
8. If the surface water right(s) appurtenant to the place of use is abandoned, forfeited, sold, transferred, leased or used on any other place of use, this right to divert ground water shall not be used without an approved transfer pursuant to Section 42-222, Idaho Code, or approval of the Department if a transfer is not required.
9. This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor exceed a combined annual maximum diversion volume of 837.0 af at the field headgate for the place of use.
10. Use of this right is combined with water from Black Canyon Irrigation District.
11. This right when combined with all other rights shall provide no more than 4.5 afa per acre at the field headgate for irrigation of the place of use.

This permit is issued pursuant to the provisions of Section 42-204, Idaho Code. Witness the signature of the Director, affixed at Boise, this 16th day of May, 2014.

JOHN WESTRA, Western Regional Manager

RE: Permit No. 63-33911

Permit Approval Notice

Dear Permit Holder:

The Department of Water Resources has issued the enclosed permit authorizing you to establish a new water right. Please be sure to thoroughly review the conditions of approval and remarks listed on your permit.

The permit is a PRELIMINARY ORDER issued by the Department pursuant to Section 67-5243, Idaho Code. It can and will become a final order without further action by the Department unless a party petitions for reconsideration or files an exception and/or brief within fourteen (14) days of the service date as described in the enclosed information sheet.

Enclosed is a form entitled 'Instructions for Proof of Beneficial Use.' Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled 'Proof of Beneficial Use.' If your project is already completed, you should complete and submit this form immediately.

The right to drill a well is not a part of this permit to appropriate water. Beginning in July of 1987, a statute was enacted which requires a drilling permit for new well construction and deepening of existing wells. If the well(s) proposed for use under this water right permit were drilled or deepened after July 1, 1987, a separate drilling permit must be obtained from this Department. Please contact the Ground Water Protection Section located here at this office or our regional office nearest you.

Also, please note that water right owners are required to report any change of water right ownership and/or mailing address to the Department within 120 days of the change. Failure to report these changes could result in a \$100 late filing fee. Contact any office of the Department or visit the Department's homepage on the Internet to obtain the proper forms and instructions.

If you have any questions, please contact me at (208)334-2190.

Sincerely,

A handwritten signature in black ink, appearing to read "John Westra". Below the signature, the word "For:" is written in a smaller, cursive script.

John Westra
Western Regional Manager

Enclosures

CERTIFICATE OF SERVICE

I hereby certify that on May 20, 2014 I mailed a true and correct copy, postage prepaid, of the foregoing PRELIMINARY ORDER(Approved Permit) to the person(s) listed below:

RE: WATER RIGHT NO.

63-33911

**A J P FARMS INC
23546 HARTLEY LN
MIDDLETON ID 83644**

**JLP FARMS INC

PARMA ID 83660**

A handwritten signature in cursive script, reading "Rachel Sommer", is written over a horizontal line.

**Rachel Sommer
Administrative Assistant I**

EXPLANATORY INFORMATION TO ACCOMPANY A PRELIMINARY ORDER

(To be used in connection with actions when a hearing was not held)

(Required by Rule of Procedure 730.02)

The accompanying order or approved document is a "Preliminary Order" issued by the department pursuant to section 67-5243, Idaho Code. It can and will become a final order without further action of the Department of Water Resources ("department") unless a party petitions for reconsideration, files an exception and brief, or requests a hearing as further described below:

PETITION FOR RECONSIDERATION

Any party may file a petition for reconsideration of a preliminary order with the department within fourteen (14) days of the service date of this order. **Note: the petition must be received by the department within this fourteen (14) day period.** The department will act on a petition for reconsideration within twenty-one (21) days of its receipt, or the petition will be considered denied by operation of law. See Section 67-5243(3) Idaho Code.

EXCEPTIONS AND BRIEFS

Within fourteen (14) days after: (a) the service date of a preliminary order, (b) the service date of a denial of a petition for reconsideration from this preliminary order, or (c) the failure within twenty-one (21) days to grant or deny a petition for reconsideration from this preliminary order, any party may in writing support or take exceptions to any part of a preliminary order and may file briefs in support of the party's position on any issue in the proceeding with the Director. Otherwise, this preliminary order will become a final order of the agency.

REQUEST FOR HEARING

Unless a right to a hearing before the Department or the Water Resource Board is otherwise provided by statute, any person aggrieved by any final decision, determination, order or action of the Director of the Department and who has not previously been afforded an opportunity for a hearing on the matter may request a hearing pursuant to section 42-1701A(3), Idaho Code. A written petition contesting the action of the Director and requesting a hearing shall be filed within fifteen (15) days after receipt of the denial or conditional approval.

ORAL ARGUMENT

If the Director grants a petition to review the preliminary order, the Director shall allow all parties an opportunity to file briefs in support of or taking exceptions to the preliminary order and may schedule oral argument in the matter before issuing a final order. If oral arguments are to be heard, the Director will within a reasonable time period notify each party of the place, date and hour for the argument of the case. Unless the Director orders otherwise, all oral arguments will be heard in Boise, Idaho.

CERTIFICATE OF SERVICE

All exceptions, briefs, requests for oral argument and any other matters filed with the Director in connection with the preliminary order shall be served on all other parties to the proceedings in accordance with IDAPA Rules 37.01.01302 and 37.01.01303 (Rules of Procedure 302 and 303).

FINAL ORDER

The Director will issue a final order within fifty-six (56) days of receipt of the written briefs, oral argument or response to briefs, whichever is later, unless waived by the parties or for good cause shown. The Director may remand the matter for further evidentiary hearings if further factual development of the record is necessary before issuing a final order. The department will serve a copy of the final order on all parties of record.

Section 67-5246(5), Idaho Code, provides as follows:

Unless a different date is stated in a final order, the order is effective fourteen (14) days after its service date if a party has not filed a petition for reconsideration. If a party has filed a petition for reconsideration with the agency head, the final order becomes effective when:

- (a) The petition for reconsideration is disposed of; or
- (b) The petition is deemed denied because the agency head did not dispose of the petition within twenty-one (21) days.

APPEAL OF FINAL ORDER TO DISTRICT COURT

Pursuant to sections 67-5270 and 67-5272, Idaho Code, if this preliminary order becomes final, any party aggrieved by the final order or orders previously issued in this case may appeal the final order and all previously issued orders in this case to district court by filing a petition in the district court of the county in which:

- i. A hearing was held,
- ii. The final agency action was taken,
- iii. The party seeking review of the order resides, or
- iv. The real property or personal property that was the subject of the agency action is located

The appeal must be filed within twenty-eight (28) days of this preliminary order becoming final. See section 67-5273, Idaho Code. The filing of an appeal to district court does not itself stay the effectiveness or enforcement of the order under appeal.

Subject: Additional Information for Application 63-33911

Dear Sharla,

On behalf of AJP Farms Inc. and JLP Farms Inc., this letter is in response to your letter dated March 26, 2014 requesting additional information to support Application 63-33911 per IDAPA 37.03.08, Water Appropriation Rules 40.05.c and 40.05.d.

Application 63-33911 proposes diversion of 2.4 cfs from a new well for supplemental irrigation of 186 acres located between Parma and Notus, Canyon County, Idaho, approximately 2 miles north of Highway 20-26, in Section 18, T5N, R4W. The information provided below supports the application.

IDAPA 37.03.08, 40.05.c: Effect on Existing Water Rights

- I. **Other Users of Spring or Stream.** Not applicable to ground water applications. Additional information was not requested.
- II. **Recorded Water Rights.** Within an approximate one-mile search area of the proposed point of diversion, 27 water rights listing ground water as a source were found; 22 for domestic and/or stock uses, 2 for commercial and stock uses and 3 for irrigation use. A summary of the water rights and their diversion locations are included in Attachment A. Only four of these water rights are located within the ½ mile radii.

Of the 26 water rights found, the majority are small domestic and stockwater rights of less than 0.08 cfs. Only five larger rights exist, totaling 3.96 cfs for irrigation and 1.37 cfs for commercial and stockwater purposes.

Recorded Well Driller's Reports. Well Driller's Reports for 23 domestic wells, 1 irrigation well, 1 injection well and 1 cathodic protection well were found within the section quarter-quarters of the one-mile search area. Of the 26 wells, depths range between 85 and 338 feet. Static water levels range from 24 to 151 feet. A summary of the Well Driller's Reports and their locations by 40-acre tract are included in Attachment B.

Available Water Level Data. IDWR hydrograph data were reviewed for 28 area wells. Hydrographs and a location map for these 28 wells are included as Attachment C.

Many of the hydrographs in Attachment C are too far away from the proposed points of diversion to draw meaningful conclusions related to local water levels near the proposed points of diversion. However, none of the hydrographs suggest significant regional water-level declines. Instead, all show fluctuations, some with increases, and some with declines.

Hydrograph Nos. 22, 23, 24, and 25 are probably most representative of groundwater conditions in the vicinity of the proposed diversion points. All of these wells are located within approximately 2 miles of the proposed 63-3911 point of diversion. Based on locations, these four wells are likely located within the same aquifer system.

- Hydrograph No. 22 (provided below), is located 2 miles southwest of the proposed 63-3911 point of diversion, and has 49 water level measurements between 1980 and 2012. The hydrograph suggests approximately no apparent decline in 32 years. The well is 142 feet deep.

- Hydrograph No. 23 (provided below), is located ½ mile northeast of the proposed point of diversion, and has 52 water level measurements between 1991 and 2012. The hydrograph suggests approximately 4 feet of decline in 21 years (0.2 ft/year) between 1991 and 2012. The well is 202 feet deep.

- Hydrograph No. 24 (provided below), is located 2 miles east of the proposed point of diversion, and has 67 water level measurements between 1990 and 2003. Approximately 2 feet of decline is suggested between 1996 and 2003 (0.3 ft/yr). The well is 281 feet deep.

- Hydrograph No. 25 (provided below), is located 2 miles east of the proposed point of diversion, and has 6 water level measurements between 1996 and 2000.

The data are not sufficient to draw significant conclusions. However, no apparent decline is indicated.

In summary, review of area water level hydrographs suggests stable water levels or small water-level declines within the vicinity of the proposed well. Rates of decline appear to be 0.3 feet per year or less. These declines are not alarming, and suggest that additional groundwater can be appropriated without injury to existing water rights. The amount of water available for appropriation cannot be determined from the available hydrograph data, and continued water-level monitoring is needed to gauge the impact of new groundwater development.

- III. **Design, Construction, or Operation Techniques to Reduce Impacts on Other Water Rights.** The proposed well will be constructed to target water-bearing zones with adequate productivity to meet the flow requirement of this application. The regional aquifer at the depths proposed appears sufficiently productive for the diversion rate proposed. The primary target for proposed withdrawals will be deeper aquifers between depths of 100 and 500 feet or more. Tapping these deep aquifers will reduce or eliminate impacts to existing water rights diverting from shallow wells and/or surface channels.

Special measures regarding the design and construction of the proposed well include use of a full-length surface seal to prevent commingling of perched and regional aquifers through the well bore.

IDAPA 37.03.08, 40.05.d: Sufficiency of Water Supply**i. Water Requirements.**

The 2.4 cfs of ground water proposed by application 63-33911 accounts for diversion of 0.013 cfs per acre for supplemental irrigation of 186 acres. Surface water from Black Canyon Irrigation District is currently used as the primary source for irrigation.

The ground water that is diverted under 63-33911 will be used in a gravity ditch irrigation system.

Data provided in Attachment C indicate that local ground water levels show fluctuations over the last 30 years, but overall do not appear to be declining at a rapid rate. The aquifer is productive, as demonstrated by local irrigation wells that exhibit yields in excess of 1,000 gpm.

In summary, the local aquifer has water available for appropriation, and the proposed well can be constructed to yield sufficient quantities of water to meet the demands proposed.

Please contact us with any questions. Thanks Sharla.

Sincerely,

Lori Graves

AFFIDAVIT OF PUBLICATION
STATE OF IDAHO)

County of Canyon)

)SS.

Linda Spencer
of Nampa, Canyon County, Idaho, being
first duly sworn, deposes and says:

1. That I am a citizen of the United States, and at all times hereinafter mentioned was over the age of eighteen years, and not a party to the above entitled action.
2. That I am the Principle Clerk of the Idaho Press-Tribune, a daily newspaper published in the City of Nampa, in the County of Canyon, State of Idaho; that the said newspaper is in general circulation in the said County of Canyon, and in the vicinity of Nampa and Caldwell, and has been uninterruptedly published in said County during a period of seventy-eight consecutive weeks prior to the first publication of this notice, a copy of which is hereto attached.
3. That the notice, of which the annexed is a printed copy, was published in said newspaper 2 times(s) in the regular and entire issue of said paper, and was printed in the newspaper proper, and not in a supplement.

That said notice was published the following:
04/03/2014 04/10/2014

Linda Spencer

STATE OF IDAHO)

County of Canyon)

On this 10th day of April in the year of
2014 before me a Notary Public, personally appeared.
Linda Spencer, known or identified
to me to be the person whose name is subscribed
to the within instrument, and being by me first
duly sworn, declared that the statements therein
are true, and acknowledge to me that he/she
executed the same.

Suzanne Remick

Notary Public for Idaho

Residing at Canyon County
My Commission expires 07/25/2018
