RE: Permit No. 63-33212

Dear Mr. Beardmore:

The Department has received your petition for reconsideration of the *Final Order Extending Moratorium* in the Boise Front Low Temperature Geothermal Resource Ground Water Management Area. You received notice of the moratorium extension because you hold a water right permit to develop a ground water right within the boundaries of the moratorium area.

As we discussed on the phone today, my review of your permit file revealed that your water use is being developed from an existing well with water temperature less than 85 degrees Fahrenheit. If the ground water from your well is not greater than 85 degrees Fahrenheit, then diversion and use of water under your permit is not subject to the moratorium extension and you may continue developing your permit.

Based on our discussion, the Department will take no further action on your petition for reconsideration and it will be considered denied by operation of law after 21 days from the date the Department received your petition. Please call me at 208-287-4948 if you have additional questions or concerns regarding this matter.

Sincerely,

A handwritten signature in black ink, appearing to read 'Jeff Peppersack', is written over a horizontal line.

Jeff Peppersack, Chief
Water Allocation Bureau
