Robert,

I received the email from Virginia Perry. Her email seemed to provide evidence that there is sufficient water at the POD to allow your water right. However, permission to use the ditch was not addressed. We will need proof of legal access to the point of diversion and the ditch from the property owners that are along the ditch.

As you know, Joann Demick is the property owner at the point of diversion. We will need permission from her to have access to the point of diversion.

I have also identified 8 other users between your property and the point of diversion that the ditch crosses. I have attached a list and a map of the 8 property owners. I would recommend creating a general permission slip to allow use of the ditch to convey your water and simply have each owner sign it.

Joy Lemaster, a property owner directly to your south, is also applying to use water in the same manner as you are. She will need to have the same authorization from the property owners so it may be beneficial to work together in gathering the needed permissions.

If you have any questions please feel free to contact me.

Thank you,

Scott R. Bergendorf

Scott,

Sorry I've been delayed in getting the information. I've been steelhead fishing about non stop!! Virginia Perry will be writing a letter to you to address the sufficient water and easement access issues. You should receive the letter shortly.

Dear scott:

I am writing to you in regard to Robert and Linda Price water right application.

This ground has been irrigated from this source beginning in 1892 when a ditch and water right were established by George P. Conlee .

The point of diversion is just outside the fence of the Joann Demick property and has been in the same location from 1892 until present date.

there is always plenty of water when we irrigate. the ditch has no out source; so any of the water users can use the water if it is being dumped into kids creek by opening the head gate at the point of diversion. When the irrigator is finished with the water they must go close the head gate and dump the water into kids creek.

as long as the water user helps with the cost of any repair in the main ditch, keeps their ditch clean and head gate in good repair there is no objection to this application.

Will this be a 2013 water right or 1892 WATER RIGHT??

The application for Joy A. LeMaster Ident # 75-14781 is also from the same source and we have no objection to this application.

thank you
Virginia Perry
