RE: Transfer Application

Mr. Perkins,

I am sending you a completed application for the transfer of water rights 29-123 and 2-125 converting the irrigation components of the water rights into irrigation storage and irrigation from storage. Here is what I need from you:

- Please answer questions 5a., 5b., and 5c. (Highlighted in green) on the third page. Question 5c. refers to liens or mortgages on the property. If this is the case we will need a letter from the lien holder allowing the transfer. We can get the process started without this letter, but in order to approve the transfer we will need the letter in hand.
- Review the entire application, if everything looks good sign the first page and send it back to me with the filing fee.
- The filing fee for this application will be as follows:
 - \$580 for the transfer fee
 - \$250 for a change in the nature of use fee
 - Total fee = \$830

I also sent a copy of the Land Surveyor report to John Falk who is the head of the Dam Safety section in Boise. He will be the one issuing final approval for the dam. Please note that we may require an updated application for the enlargement of the dam due to the new size of the reservoir, this may come with more requirements. I should be able to let you know next week what we will need in order for your dam application to be approved. We had discussed in our office the possibility of storing some water in the reservoir before your transfer is approved based on the '24 hour rule'. It is important to know that NO water should be stored in the reservoir until your dam is approved for storage. I will be in contact with you next week to discuss what this will entail.

Thanks for your cooperation, please call if you have any questions.
