Re: 2013 Annual Report for Water Right 95-9323

Water Right Users,

This letter is in response to the 2013 annual water use report that was submitted to Idaho Department of Water Resources (IDWR) dated April 11, 2014. IDWR has reviewed the information in the annual report detailing the water meter readings for each property using water authorized by 95-9323, and finds that the reported water use is in compliance with the conditions of license 95-9323.

Condition # 2 states:

The right holder shall record the quantity of water diverted and annually report before October 15 of each year, diversions of water and/or other pertinent hydrologic and system information.

Condition # 5 states:

The average daily diversion volume (based on annual usage) for this municipal right shall not exceed 100 gallons for the common area and 900 gallons per home that has been constructed.

The Department also recognizes the meter is now installed on Mr. McKahan's home and will look for this information next October on the 2014 annual report. In addition, the Department thanks Fernan Estates Corporation for their efforts in clearly explaining the submitted data.

Regards,

Patrick Kelly
