Mr. Loertscher,

Your transfer application for water rights 25-227 and 25-55B has been advertised and is in final review for approval. During this review process an error was discovered in the application. Not all of the 'Points of Diversions' were listed in the application and also the acres on the land list were a little off.

I have amended the application and have attached it to the email.

- The application must have all of the points of diversion listed and only the new point was listed.
- The water right is good for 200 acres. However, somehow in the adjudication a rounding error only gave you 199.5. I have corrected the land list to give you the complete 200 acres.

Please call or email to approve the correction and then the application will be ready for approval.

If you have any question please feel free to call or email me.

Thanks,
