I finally located this information. Don't you hate it when you put something away and then can't find it? ug. will send soonest.
Thanks for your patience.

Cindy,

If you wouldn't mind emailing and snail mailing me a copy of the Request for variance along with all the attachments that were included, I will get it all into the physical file and profiled.

Thanks,

Darla

Darla, I think I do have what you need, and intend to do a physical inspection too if that would help. It will be Wednesday this week before I am able to look into this but I will do so.
Cindy

Re: Correspondence Regarding Request for Variance of Measurement Requirements

Dear Cindy Yenter
Watermaster, Water District 130:

On March 13, 2014, I processed Proof of Beneficial Use filed by the permit holders. During my review of the proof statement and the water right permit, I found that permit condition no. 13 had not been complied with.

Condition no. 13 of this permit states:

“Prior to diversion and use of water under this right the right holder shall install and maintain an acceptable measuring device, in accordance with Department specifications, on the HVAC supply or discharge line. This measuring device requirement may be waived if the water right holder makes a written request for variance and submits a pump curve for the installed pump and detailed information for the installed ground source heat pump or HVAC system. Additionally, the discharge pipe to the Snake River from the HVAC system shall incorporate an accessible ten foot section of straight pipe which flows full or may be made to flow full, to allow IDWR to install a portable measuring device.”

In my proof acknowledgment letter dated March 13, 2014, I recommended this condition be complied with immediately and prior to the field exam. In response, I received a letter with several attachments from Vicky King (attached above). Included in the attachments she sent to me is a copy of a letter she sent to you dated March 5, 2013, which I do not find to have been included in the physical water right file. I believe that the copy of her letter is in response to your letter dated February 27, 2013. However, the state office does not have a record of any correspondence received between your letter of February 27, 2013, and the Permit Approval Notice sent out that same day, February 27, 2013.

At this point I am not sure if the permit holders have complied with your letter of February 27, 2013, as Vicky did not include the information from Terry's Heating & Electric which she gave to you as stated in her recent letter to me (attached above). Nor do I find any correspondence from you back to her or to the Department regarding the matter.

Do you happen to have the original request for variance dated March 5, 2013, and submittal of the pump curve along with information for the heat pump or HVAC system? I will also need your approval on the request. All this information is needed for the physical water right file.

Sincerely,

Darla Block
