February 26th, 2014

To Director Gary Spackman,

This letter is in reference to application 15-7365 by Daniel Evans of Samaria, Idaho.

I own 70 acres south of this proposed well and also half of the flow of Willow Springs. Willow Springs is a naturally free flowing spring used for irrigation and sustaining wildlife Habitat. Located in the NE $\frac{1}{4}$ SE $\frac{1}{4}$ of Sec. 14 TWP. 15S. R.35 E.B.M. I am concerned that this well will decrease the flow of the natural springs. With Willow Springs being my only source of water to irrigate with. The flow from Willow Springs has decreased over the past years. Without sufficient flow from this spring it will be even more devastating to my crops, cattle production and the natural habitat that surrounds the property.

Sincerely,

John V Christophersen
