RE: Application for Transfer of Rt. 63-11245

Gentlemen:

We have received, and are in the process of reviewing, the above referenced application for transfer to add a point of diversion to your water right. We find that before we can proceed with this application, you need to cover the additional water uses for your dairy. We find that Rt. 63-11245 is the only valid water right for your water use at this dairy. Rt. 63-11245 only covers water for the stock portion of your dairy use. There is no water right for the commercial portion of your water use.

In May of 2001, you filed an application for permit to cover the commercial use at your dairy. We issued Permit 63-31231 on December 7, 2001, to cover the commercial portion of your dairy use. However, in May of 2002 you failed to submit proof of beneficial use of the permit and it was lapsed.

Before we can proceed with your application for transfer it would be helpful if you had all of your existing water uses covered with the required water rights. You need to file an application for permit for your commercial use for your dairy before we will proceed with processing your transfer application. Once you have submitted the application for permit we will proceed with transfer processing. You could also submit proof of beneficial use, with the proof fee, and we would be able to issue a water right license based on the system that has been in place. We have enclosed an application for permit form and proof of beneficial use form for your convenience. We have also included a proof reading report of the permit you previously had recorded for this use.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

KAY WALKER
Sr. Water Resource Agent
