RE: Water Right Permit No. 75-14477

Dear Permit Holder(s):

The Department of Water Resources (IDWR) is reviewing the permit referenced above prior to issuing a water right license. By issuing a license, IDWR confirms the extent of development that has been established in compliance with the terms of the permit. The examiner who verified your water use reported that certain elements of the permit have been developed differently than described on your permit. Changes that do not increase the authorized use of water under the permit can be requested and approved in accordance with Section 42-211, Idaho Code.

Based on the examiner's report, the **Place(s) of Use** were developed differently than described on your permit.

The Application for Amendment form was first mailed to you December 12, 2013. IDWR has not received the signed amendment or filing fee at this time. The amendment depicts the elements of the water right as they will appear on the license when it is issued if we receive the signed amendment and filing fee. A copy of the amendment is enclosed. Please review the amendment form carefully. If you concur with the information presented, please sign the form and return it to IDWR with the \$100.00 filing fee by April 25, 2014.

If the application for amendment is not received by IDWR by April 25th, 2014, it will be assumed that you do not agree with the changes as proposed by the amendment. IDWR will then issue the license based on the elements allowed under the existing permit. The license will be issued with a rate of diversion of 0.02 cfs, an annual volume of 1.8 AF, and the irrigation of 0.5 acres within the SESW quarter of Section 19, Township 21 North, Range 22 East. Licensure based on the existing permit will result in your need to cease irrigation of the lands in the NESW quarter of Section 19, Township 21 North, Range 22 East until a valid water right can be secured for those lands.

If you have any questions, please call me at 208-287-4938.

Sincerely,

Danielle Favreau
