
COMMUNICATION MEMORANDUM

TO: FILE 75-14477
FROM: DANIELLE FAVREAU
SUBJECT: PHONE CALL FROM MICHAEL PHILPOTT
DATE: JANUARY 3, 2014
CC:

Mr. Philpott called me at approximately 9:30 am to discuss the amendment he received in the mail to permit 75-14477. We reviewed the amendment and map. He could see that the description of the irrigation on his property spanned 2 quarter quarters per the map provided by IDWR. I explained that the permit only listed the SESW (Lot 4) but as described covered both the NESW (lot 3) & SESW (lot 4), hence the amendment. He asked if the POD on the map was the POD for 75-14477. I said it was.

Mr. Philpott asked if there was anything additionally that he needed to do regarding the conditions on Amendmet to 75-14477. We briefly went through the conditions where I explained that conditions 104 and 065 referred to permit 75-14477 being supplemental to his Kane-Ramey Ditch right and that the groundwater right cannot be used instead of the surface water right. As conditions 196 and R02 were on the permit, he did not need to do anything else. Conditions 197 and 198 only apply when he was notified by the Department and X31 were the limitations on his rights.

Mr. Philpott asked if he could change his irrigation practice from flood irrigation to sprinkler irrigation. I said that he would have to discuss that with the Kane-Ramey Ditch Company and a Water Right Agent but I was unaware of any regulation explicitly excluding the change.

At the end of the call, I said that once I received the signed amendment and \$100.00 fee made out to IDWR, hopefully the next thing he would receive from me would be his license.
