Joel,

If the water master feels the setup is suitable, then you are ok. You can go ahead and mark the Lockable controlling device as, required and installed under item 7.

Hi Darla,

Thanks for contacting us. We have been trying to ascertain what a lockable device "suitable to the approval of the Department, in a manner that will provide the watermaster suitable control of the diversion" would actually mean. I did get hold of the water master for this area, Jerry Eastman (Ph 208 756 4676) who feels that our setup is "suitable." Can I go ahead and mark this as installed even though I am planning on replacing the butterfly valve this summer with a better headgate when the ground thaws? Does this comply with the "suitable to the approval of the Department" requirement?

Thanks,
Joel Dye

Dear Permit Holders:

Re: Statement of Completion Form Returned to you for Completion

On March 10, 2014, I returned your statement of completion (proof) form you filed with the Department because of missing or incomplete information. Please complete the form and mail it back to my attention. I am unable to move forward with the processing of your proof statement until I have received the completed form. In case I forgot to enclose a copy of your water right permit, enclosed is a copy of your permit for your reference.

Sincerely,

Darla Block
