Ms. Hersley, You are very right, I had forgotten we applied for water rights on the St. Joe River for our rv lot. We have a small pump we put directly in the river to pump some water for the lawn. There is nothing else we plan to do as far as development. My printer is not working, so if you need another form filled out, could you please mail one to me. I really appreciate your help in this matter.

>  
> Water Right Permit 91-7578 is a domestic use permit with a point of diversion from the St. Joe River and a diversion rate of 0.04 cfs. It is an RV site on the St. Joe River. On the proof you sent in, you listed the point of diversion as a spring/pond for stockwater use of 2 horses. I believe you are confusing water right permit 91-7578 with a license you have in Basin 95.
