*****TIME SENSITIVE RESPONSE REQUIRED*****

Dear Applicant:

The Department of Water Resources acknowledges receipt of your application to rent water from the Water Supply Bank. **I have enclosed a Water Supply Bank Rental Agreement for your review and signature.** Upon signature and return of the original agreement, together with the rental fee described below, the Department will also sign the original agreement and return an executed copy to you. Execution of the agreement and compliance with the conditions of approval authorize diversion and use of water as provided in the agreement.

A rental fee of \$6,009.50 was calculated based on the current rental rate of \$17.00 per acre-foot times a diversion volume of 353.5 acre-feet. We then deducted 90% of the fee for the right owned by the applicant ($158 \times \$17 \times 90\% = \$2,417.40$). If you would like to terminate the agreement prior to the end of the rental period, you must submit written notice of your intent to the Department at least 30 days prior to the rental fee due date.

Please send a check for \$3,592.10 made payable to the Idaho Department of Water Resources, **together with the signed rental agreement, within 14 days** so I can complete processing. Pursuant to the Water Supply Bank Rules, 90% of fee for rights owned by other parties than the renter or \$2,991.15 of the rental fee will be paid to the lessor(s) and 10% of fee (for all rented rights) or \$600.95 will be retained by the Department to offset administrative costs.

Cherie,

I have attached my rental calculations for the 88.4 acre rental for KBC Farms for 2014. I have also attached the data entry pages from my ESPA model analysis that I have submitted to Michele Edl for the 88.4 acres.

The volume of 353.6 acre-feet and the 88.4 acres applied for in the KBC Farm rental is adequate to fully cover the 2014 rental. I just talked with Klaren Koompin this morning about the new small pivots that are being installed. The design flow rate for these pivots will be 6.5 gpm/acre with no end guns. With an application rate of 6.5 gpm/acre, an acre amount of 63.5 acres can be irrigated simultaneously from 0.92 cfs. The remaining 24.9 acres will have to be irrigated when the 63.5 acres are not being irrigated. It is simply a matter of managing water flow and the pivots that will be applying water at the same time. All of the new pivots under water right 35-14308 will not irrigating at the same time.

Greg,

I was looking at this today and wondered if you had a response for the low rate/acre question on this rental. Ultimately the rental only provides 0.01 cfs/acre or 4.8 gpm. From what I understand pivots typically do 6-12 gpm, 8 gpm being the average. So 4.8 gpm seems too low to do anything. I need some sort of explanation to justify the low rate/acre. For example, what crops are they going to grow there, will they doing a rotation, etc.

Or perhaps the rate/acre needs to be bumped up. If you bump up rate, you must also bump up the water right's proportionate acres and volume.

Also, notice that the volumes you modeled only provide for 85.7 acres, not the 88.4 acres you requested. You would have to rent more water to get the acres up to what you are actually requesting.

Please let me know on the rate/acre question and the total acres issue as soon as possible. I can approve the rental the way it is but I don't think they will be able to do much with the low rate/acre. If you want me to proceed how it is, I would also need a new map showing the 85.7 acres.

Thanks,
Cherie

Re: Review & Analysis of KBC Farms Application to Rent Water from the State Water Supply Bank

PURPOSE/NARRATIVE: The applicant would like to irrigate 88.4 acres at a place where the appurtenant water right, 35-14308, is being rented to a third party. The applicant is adding the additional water into their comingled system that consists of 10 points of diversion.

AUTHORITY TO FILE: Klaren Koopman is the managing partner of KBC Farms. I was able to confirm this with IDSOS. Additionally, the POU is owned by KBC Farms.

WATER RIGHT VALIDITY: Water rights 29-14054 thru 14056 and 29-14080 thru 14082 are owned by the City of Chubbuck and have specific acres associated with their municipal use. These water rights were part of transfer no 78626 that was approved 7/2013. Since these water rights are essential for irrigation purposes, there is not going to be a change in nature of use evaluation through this rental.

Water right 35-14040 was recently leased into the bank. The water right is valid and can be rented.

Water rights 43-13595 and 43-13597 have been in the bank for several years and have been rented regularly. These water rights are valid and have been idled per their lease agreement.

INJURY TO OTHER WATER RIGHTS: The water rights that the applicant selected for the rental will not cause injury per ESPA modeling. The ESPA modeling that was submitted by the applicant has been evaluated by Michele Edl for correctness. Please see her memo addressing this issue. Note that Greg Sullivan had to submit a ~~second~~ ^{third} model for 35-14040 as his volumes were off in his 2nd modeling effort. Michele checked Greg's numbers for 35-14040 and determined that the rental is within IDWR impact tolerances. CP

ENLARGEMENT OF USE: No enlargement is expected through this rental

LOCAL PUBLIC INTEREST: Review staff has no information to suggest this application is inconsistent with the local public interest.

BENEFICIAL USE/CONSERVATION OF WATER RESOURCES:

The rental appears consistent with conservation of water resources in Idaho.

DEPARTMENT STAFF OR WATERMASTER COMMENTS:

I contacted the watermaster/regional manager and have attached his response.

RENTAL POU—NOTICE THIS COVERS THE POU FOR 35-14308. HOWEVER THESE ACRES UNDER 35-14308 ARE LEASED INTO THE BANK.

Cherie,

This one is complicated. Isn't it possible to swap out water rights, so that KBCP gets their original rights back for use. Then, the people renting the KBCP water can instead rent the City of Chubbuck water.

I don't think we should hassle the City of Chubbuck about the one year limit included as a transfer condition. If the city places the water rights immediately into the WSB, I don't think the 1 year limit should apply. Chubbuck is purchasing water to meet future needs and is placing the water rights into the WSB until the demand occurs. I don't share the vision of using the one-year completion condition as a basis for voiding transfers.

Feel free to call if you would like to discuss further.

James

Subject: KBC Farms Updated Lease and Rental

Hi James,

I sent you a request to review a lease for KBC and realized that they want to rent water for the same acres that are being leased. So these two applications can be considered together. I updated my lease memo and have also attached my rental memo. In my rental memo, I have some questions for you to consider in the WATERMASTER COMMENT section. Thanks James.

Re: ESPA Analysis of 2014 Water Supply Rental Application KBC Farms, LLC

Introduction

Brockway Engineering's Greg Sullivan provided the ESPA modeling required for this application. The initial modeling and the first revision contained serious errors which delayed the application processing.

I spoke with Mr. Sullivan over the phone both yesterday and today to expedite the corrections needed in his ESPA modeling. Yesterday, after a discussion of remaining problems in the more complex of the two model runs, he provided (via email) a second revision. Today he explained the logic for why no mitigation was needed for this rental.

Results

The 1st revision of the modeling for water right 35-14040 and the 2nd revision for the modeling of eight water rights (29-14054, 29-14055, 29-14056, 29-14080, 29-14081, 29-14082, 43-13595 and 43-13597) are attached.

Discussion

Although both my analysis and Greg Sullivan's revised analysis show that there are impacts to the Neeley to Minidoka reach, the rentals do not require mitigation.

On at least two previous occasions (transfer 75910 and 77467), KBC Farms provided the Department an opportunity to consider an analysis of the ESPA which combined the impact of two neighboring reaches: the Near Blackfoot to Neeley reach and the Neeley to Minidoka reach. The Department accepted the combined reach analysis in those cases and this rental application is a similar scenario. Mr. Sullivan has provided a pdf file of the spreadsheet that he created to demonstrate the combined effect. (See email to Cherie Palmer dated February 24, 2014 and its attachments.)

I confirmed with Jeff Peppersack that this methodology is acceptable. It is but it applies only to these reaches and only on a case-by-case basis. Acceptable injury analysis still depends on an accurate understanding of the proximity of the wells to the river, water right priority dates, etc., on imputing those and other parameters into the modeling utility and then running model.

Conclusions/Recommendations

Depletions to the Neeley to Minidoka reach are offset by the credits to the Near Blackfoot to Neeley reach. No mitigation is required. The rental application can be processed.

RE: Water Supply Bank Rental Application – Additional Information Required

Dear Applicant,

The Idaho Department of Water Resources received your application to rent water rights from the Idaho Water Resource Board's Water Supply Bank however, as submitted, your application is incomplete.

In accordance with Water Supply Bank Rule 30.01 "the Director will evaluate applications...whether there will be injury to other water rights,...whether the water supply available from applicable rights in the Board's water supply bank is sufficient for the use intended..."

Currently, your application cannot be processed. The required information is missing or insufficient:

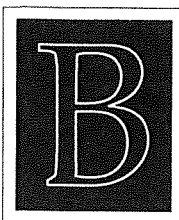

- ☐ A completed *Application to Rent Water from the Water Supply Bank*
- ☒ Attach the results of an ESPA analysis and a detailed mitigation plan to offset any depletions to hydraulically connected reaches of the Snake River. The results that you did submit included multiple errors. For example, the location of the proposed point of diversion was incorrect. An analysis is part of your application and must be correct for the Department to determine the viability of your proposal.
- ☐ The place of use described in item #4 of the application does not match your map
- ☐ The signature is missing or we need power of attorney documentation for the signor

Re: KBC Farms LLC

Dear Mrs. Skaggs:

KBC Farms is submitting a lease application for 35-14308 that will super seed the current approved lease application that the Idaho Water Supply Bank has on record. KBC Farms is also submitting a rental application for 88.4 acres for the 2014 irrigation season.

Water right 35-14308 was transferred to a new POD and POU by Transfer 78268 earlier this year. There are currently three rental contracts through the Idaho Water Supply Bank that provide 98.7 acres of irrigation water.

The lease application is for 35-14308. Currently there are 208.0 acres leased to the Water Supply Bank under 35-14308. The attached lease application will reduce the number of acres leased to 98.7 acres. The lease amount will be reduced each year until all three rental contracts expire.

The rental application will provide the necessary water to irrigated 88.4 acres for the 2014 irrigation season. The rental proposes to rent:

20.0 acres	29-14054, 29-14055, 29-14056 City of Chubbuck (Howard & Marilyn Armstrong Trust)
23.9 acres	29-14080, 29-14081, 29-14082 City of Chubbuck (Howard Armstrong & Sons Inc)
5.0 acres	43-13595, 43-13597 Ward Land and Livestock
39.5 acres	35-14040 KBC Farms LL
