Subject: Water Right 57-7684 Questions

Hello Raul,

The information you provided for water right 57-7684, Project While Horse Reservoir and Spring (09074), didn't have the pond depths. My notes said you wanted to check that instead of using the standard 3.5 feet average depth on the rest of the ponds. Do you want to use the 3.5 feet average depth on these ponds, or do you have another average depth for me?

Other than not having the pond depths, the information you provided was great.

Thank you for time and patience. I know this is difficult process. We are getting pretty close to finishing these up.
