Subject: Water Permit 13-7883 Request for Information
Attachments: diversion_map.pdf

Mr. Nielsen,

I have been assigned to do the license for water permit 13-7883. This permit qualifies for an in-office field exam. However to do a theoretical flow rate, I need a better understanding of the water system that you have in place. In your permit, you describe a ½ hp pump pumping water from 2 streams into a 1,000 gallon tank. The water is then pumped to a 7,000 gallon tank where the water is then distributed throughout the property. Attached is an aerial photo of your property. Could you draw the locations of these tanks as well as outline the perforated and solid piping? Either make a digital edit of the photo attached or draw, scan then send either by e-mail or mail the image back to me. I may then continue the licensing process for your water right once I have this information. Thank you for your assistance!

Regards,

Patrick Kelly
