Dear Right Holder:

Transfer of Water Right 77754 was approved on October 5, 2012 for the rights referenced above. One of the conditions of approval requires the specific location of 783.0 acres authorized for irrigation under these combined rights be identified within the larger 1605.0 acre place of use prior to irrigation. This information has not been submitted to the Department although it appears portions of the place of use were irrigated in the 2013 irrigation season.

Please comply with this condition by submittal of a land list and a representative electronic shape file, or by submittal of a land list and a map sufficiently detailed to allow creation of an electronic shape file to be associated with these rights in the geographic information system component of the water rights database maintained by the department.

Submit this information as soon as possible if you are proposing to irrigate any portion of the lands this year. I have attached the current place of use description and a blank land list form for your convenience.

Sincerely,

A handwritten signature in cursive script that reads "Pamela S. Skaggs". The signature is written in dark ink and is positioned above the printed name and title.
