Mr. Hendon:

There is one more piece of information I need. We need to know what water bearing zone you plan to appropriate. This would be the area in the well that the pump will be placed. Please complete this statement and return it to me. "Water bearing zone to be appropriated is from ____ to ____ feet."

Thanks for your quick response regarding the map this morning.

RE: Application for Permit No. 67-15101

Dear Mr. Hendon:

I have been assigned to review the above referenced application for permit and find we need to have a map of your proposal. The application form is not considered acceptable until we have a map that shows the proposed place of use and point of diversion. In order to assist you with this, I have located your property using the Payette County tax lot information and printed a map for your convenience. Your property is identified within the blue area on the enclosed map. Please mark on the map where your well is located and return it to my attention at your earliest convenience.

I found a well log in the area of your application for a 100 foot well drilled in November of 1998. This well was drilled for Leonard Hendon. Could this be the well log for the well you plan to use to irrigate your property? *This well is domestic for house/yard Looking to drill new well for irrigation only.*
Please mark the location of your well on the enclosed map and return it to this office within the next 30 days for application processing to continue. You may seek additional time to provide the information by making a written request to delay or interrupt processing. A response including the requested information, or a request for more time to seek the information, must be received within thirty (30) days. The application will be voided without a timely written reply.

Please let me know if you need more information. Thank you for your attention to this matter.

Sincerely,
